Joseph K. Perloff, John S. Child, Jamil Aboulhosn, 2008-08-28 Dr Perloff the founding father of the field of adult congenital heart disease presents a decade's worth of research and clinical data in the completely redefined 3rd edition to bring you the most current information. With advances in diagnosis and treatment in children more and more of those with CHD survive well into adulthood. Expert contributors in various fields offer a multi-disciplinary multi-system approach to treatment so you get comprehensive coverage on all aspects of the subspecialty including basic unoperated malformations, medical and surgical perspectives, postoperative residue and sequelae. As someone who treats these patients you need to be ready to provide the continual care they require. Conveys a multidisciplinary multi-system approach to the lifelong care of adult CHD patients to put treatment in a broader context. Presents information in a consistent logical style so the information you need is easy to find and apply. Supplements the text with 600 clear conceptual illustrations to clarify difficult concepts. Features completely rewritten chapters to include the latest developments in the field such as major advances in surgical and interventional techniques and the various needs of patients with adult CHD. Incorporates recently published trials such as those involving cyanotic CHD and atherogenesis, coronary microcirculation and pathogenesis of thrombocytopenia to supplement the chapter on cyanotic CHD. Emphasizes advances in imaging in a new section edited by an expert that covers echocardiography as well as specialized imaging techniques. Illustrates the full range of advances in the field with 600 images that reflect the latest progress. Includes new chapters: Global Scope of ACHD, Cardiac Transplantation, Electrophysiologic Abnormalities in Unoperated Patients and Residue and Sequelae After Cardiac Surgery to provide you with the latest information on the growth of the subspecialty and its effect on treatment. Presents revisions by a new authorship of experts in infectious disease, genetics and epidemiology, sports medicine, neurology, cardiac surgery, cardiac anesthesiology and more.
