Case Studies In Clinical Laboratory Science:

Case Studies in Clinical Laboratory Science Linda Graves,2002 This unique collection of 55 multidisciplinary case studies is designed to help laboratory technologists and technicians experience how departments work together to help the physician make a diagnosis and determine the best course of treatment for the patient In working through the comprehensive real world scenarios readers deal firsthand with interpreting data from two three or four disciplines Blood Bank Chemistry Hematology Immunology Microbiology Urinalysis integrating the facts laboratory data from different departments and thinking critically about what they mean Includes 55 cases 11 Blood Bank cases 12 Chemistry cases 10 Hematology Coagulation cases 5 Immunology Serology cases 10 Microbiology cases 7 Urinalysis cases Technicians and technologists who have been out of the field for awhile and are in the process of reentry into the profession and technicians and technologists who are looking for a general review of clinical laboratory science

Diagnostic Reasoning Ibrahim A. Hashim,2025-02-01 Training in clinical chemistry is acquired via different avenues that include didactic lectures on pathophysiology of disease methodologies and practical aspects of testing and through attendance of operations meetings sign out sessions seminars and tutorials There is little instruction on how to apply the vast amount of knowledge gained in the process to practice In other branches of medicine cases are regularly presented with clinical information and therapeutic interventions which form the basis of training Diagnostic Reasoning Laboratory Based Case Studies in Clinical Chemistry fills this gap for clinical chemistry The concise and practical approach of the book including real life scenarios is an excellent resource for pathology trainees clinical laboratory science students clinical chemistry fellows clinical laboratory professionals and clinicians These cases help professionals remain competent in the field and be successful in their board exams The cases are stated as they present often with no or few clinical details accompanying the sample request with only barcoded samples arriving into the laboratory In a busy laboratory thousands of these cases are received daily and it is impossible to review the clinical information associated with the specimens There are no books with a similar approach and emphasis Fills the gap in teaching by addressing the subject from a laboratory practical prospective with concomitant application of evidence based laboratory investigation Presents laboratory data in tabulated format to resemble real life scenarios shows list of abbreviations and conversion factors Cases begin with clinical presentation and information not available to those within the clinical laboratory Discusses the differential diagnosis and suggests additional testing or investigations as necessary
