

Operation Guide 2608 2638 2688 CASIO.

Getting Acquainted

Compare settings upon your activation of this CASIO watch. To get the most out of your CASIO watch, be sure to carefully read this manual and follow a schedule for care at your own discretion.

- This watch does not have a time zone that corresponds to the Greenwich Mean Time differential of +3.5 hours. Because of this, the radio-controlled timekeeping and World Time functions will not display the correct time for Newfoundland, Canada.

Expose the watch to bright light to change its battery before using it. You can use this watch from just its battery is being changed by exposure to bright light.

- Be sure to read "Battery" of this manual for important information you need to know when replacing the watch's battery.

If the display of the watch is blank...

- If the sleep indicator (4g the LED) is on the display, it means that the display is blank because the watch's Power Saving Function has shut it to conserve power. Pressing the crown automatically turns off the display and enters a sleep state whenever your watch is left in an area where it is dark for a certain period.
- The crown function depends on the state it is in when it is pressed. Pressing the crown will turn on the display if you have it in a sleep state. If you press any button, or if you brighten the watch, it will turn on the display for reading.
- Turn back up to two minutes for the display to turn on.
- See "Power Saving Function" for more information.

General Guide

- Press **[C]** to change from mode to mode.
- In any mode, press **[L]** to illuminate the display.

Radio-controlled Atomic Timekeeping

This watch receives a time calibration signal and updates its time setting accordingly. This time calibration signal, which is broadcast from the United States and Canada, contains time, date, and city information.

- This watch is designed to pick up the time calibration signal in the following areas:
 - Reception is possible within North America.
 - The "North America" in the city name refers to the area that consists of Canada, the continental United States, and Alaska.

Current Time Setting

This watch automatically adjusts its time setting in accordance with a time calibration signal. You can also perform a manual procedure to set the time and date, when necessary.

- The first thing you should do after purchasing this watch is to set your Home City, which is the city where you will normally use the watch. For more information, see "to set your Home City" below.
- When using the watch outside of the range of the transmitter in Fort Collins, you need to manually adjust the time as required. See "Timekeeping" for information.

To set your Home City

1. In the Timekeeping Mode, hold down **[L]** (until the city code starts to flash), which indicates that setting begins.
2. Use **[C]** (year) and **[D]** (month) to select the city code you want to use for your Home City.
- The following are the city codes for major cities in North America:
 - LAX (PACIFIC) (Los Angeles, San Francisco, Las Vegas, Seattle, Minneapolis, Phoenix)
 - CHY (CENTRAL) (Chicago, Dallas, Fort Worth, New Orleans, Winnipeg, Mexico City)
 - NYC (EASTERN) (New York, Newark, Miami, Boston, Montreal)
- Note that this watch does not have a city code that corresponds to Newfoundland.
3. Press **[L]** twice to end the setting screen.
4. The first press of **[L]** displays the 12:04-hour setting screen. Pressing **[L]** again ends the setting screen.

Important!

- To set your watch, you should show the correct time as soon as you visit your Home City code. If it does not, it should adjust automatically after the next auto-adjust operation in the range of the signal. You can also perform manual receipt of your Home City code.
- If you are in an area that does not use Daylight Saving Time (summer time), turn off the DST setting.

Time Calibration Signal Reception

Time and date information you can use to receive the time calibration signal: auto-receive and manual-receive.

About This Manual

- The operation procedures for Models 2608, 2638 and 2688 are identical. All of the illustrations in this manual show Model 2608.
- Button operation and functions are described herein in the illustration.
- Each section of this manual provides you with the information you need to perform operations in a simple way. Further details and technical information can be found in the "Reference" section.

Auto Receive

When auto-receive, the watch automatically picks up the time calibration signal (hour, minute, day) at 2:00 a.m., 4:00 a.m., and 8:00 a.m. For more information, see "Auto Receive" below.

Manual Receive

Manual-receive sets, you start a time calibration receipt operation with the press of a button. For more information, see "to perform manual receive" below.

Important!

- When going ready to receive the time calibration signal, position the watch as shown in the nearby illustration, with its LCD screen side facing towards a window. Make sure there are no other objects nearby.

- The watch should not be on its case or facing the wrong way.
- Proper signal reception can be difficult or even impossible under the conditions listed below.

- Signal reception is normally better at night than during the day.
- After calibration signal reception starts from the top to the bottom, but in some cases it can take up to 12 minutes. Make sure that you do not perform any button operations or move the watch during this time.

- Under good reception conditions, signal reception is possible within a radius of about 2,000 miles (3,000 kilometers) from the Fort Collins transmitter.
