without the presence of the mysterious aliens who have dogged the Time Traders from the start Without many references to the Russian US race to colonize space this book is not much dated at all Murdock s resentment about the interjection of a woman into their crew is all too believable However Norton rarely takes the expected route and the story remains thoroughly entertaining *United States of America V. Malcolm Greenlees,2008 Biologist Michael Collins has been studying wild silk moths since he was a boy This family which includes the largest and most colorful of the North American moths led Collins into a long career as a scientist and has provided him with significant insights into the process by which new species evolve *Moth Catcher* is Collins s engaging account of his development as a scientist and of his groundbreaking research The canyon and pass environments of the American West offer a setting in which since the last Ice Age organisms have adapted to new surroundings and where many have formed new species Collins has discovered in the Sierra Nevada what geneticists call a hybrid zone where two species interbreed This hybrid zone is unusual because both sexes are fertile unlike lab bred hybrids between the same silk moth species Collins explains how such hybrid populations serve as laboratories in nature where the process of speciation can be observed and studied This book offers a fascinating view into the work of a field scientist and the ways that evolution continues to operate around us Collins s colorful accounts of his fieldwork will delight any reader who loves the outdoors and is captivated by the diversity and interrelations of the life forms found there And his passion for his research and the fragile exquisite creatures that he studies will inspire a new appreciation of the wonders of the natural world and the myriad life forms that occupy it *Uncle Jeremiah and His Neighbors at the St. Louis Exposition* Charles McClellan Stevens,1904
