How To Lessen Misunderstandings:

Communication in Paramedic Practice Glyn O'Toole, 2023-10-01 The ability to communicate well is the single most important skill for a paramedic. But despite an emphasis on communication in paramedicine assessment and standards there has never been a resource specifically tailored to the unique environments in which paramedics practise. This new book fills that gap. Communication in Paramedic Practice is designed as a primer on the importance for paramedics of communicating well and how to achieve this in real life. It encourages self-reflection on your own communication style and covers important considerations such as listening, managing distress, being culturally responsive and non-verbal communication. Written by experts in this field and full of relevant examples and opportunities to practise, this book will help you communicate comfortably and confidently for better patient outcomes, increased workplace safety and more efficient transfer of information. Four sections cover the significance of interpersonal communication, developing self-awareness, managing realities of communication as a paramedic and scenarios for practice. Promotes self-reflection on your personal communication style and habits. Introduces the strategies and skills you need for real life. Encourages the development of confidence through activities, scenarios and case studies. Wide range of examples to reflect paramedic practice. Relevant resources for ongoing development and improvement of communication skills. Student resources on Evolve. Answers to end of chapter review questions. Student quiz. Student and instructor resources on Evolve. Semester planner. Student quiz. Multiple choice questions. Tutorial activities. Student quiz. True/false. PowerPoint slides.

Communication Glyn O'Toole, 2008 This text introduces health sciences students to the various interpersonal communication skills that are commonly used within health settings to establish relationships with clients and fellow professionals and improve therapeutic outcomes. It focuses on developing self-awareness and skills for use in health settings and covers the types of scenarios commonly encountered in health settings that are rarely covered in generic professional communication texts. Perspectives and examples are drawn from a wide range of health professions. The book includes activities that will enable students to reflect on their experiences and practice using the skills.
