Gadamer For Architects Thinkers For Architects:

Gadamer for Architects Paul Kidder, 2013-02-11 Providing a concise and accessible introduction to the work of the celebrated twentieth century German philosopher Hans Georg Gadamer this book focuses on the aspects of Gadamer's philosophy that have been the most influential among architects educators in architecture and architectural theorists Gadamer's philosophy of art gives a special place to the activity of play as it occurs in artistic creation His reflections on meaning and symbolism in art draw upon his teacher Martin Heidegger while moving Heidegger's thought in new directions His theory of interpretation or philosophical hermeneutics offers profound ways to understand the influence of the past upon the present and to appropriate cultural history in ever new forms For architects architectural theorists architectural historians and students in these fields Gadamer's thought opens a world of possibilities for understanding how building today can be rich with human meaning relating to architecture's history in ways that do not merely repeat nor repudiate that history In addition Gadamer's sensitivity to the importance of practical thinking to the way that theory arises out of practice gives his thought a remarkable usefulness in the everyday work of professional life *Kenosis Creativity Architecture*

Randall S. Lindstrom, 2021-03-21 *Kenosis Creativity Architecture* locates and explores creativity's grounding in the ancient concept of kenosis the emptying that allows creativity to happen that makes appearance possible It concretises that grounding through architecture a primal expression of human creativity critically examining for the first time kenotic instantiations evidenced in four iconic international projects works by Kahn Pei Ando and Libeskind Then in a final turn the potentiality of architecture's own emptying is probed Architect and author Randall Lindstrom draws on Western and Eastern philosophy including that of Heidegger Levinas Derrida Vattimo Nishida and Nishitani as well as on the theology of Christianity Judaism and aspects of Buddhism Hinduism and Islam Every chapter expands the argument that if responsiveness to our world is taken seriously if proper and sustainable responses are to be realised then a deeper understanding of creativity and so kenosis is essential This book opens up a way of thinking about creativity and humanity's readiness to be creative It thereby presents a crucial enquiry at the nexus of architecture philosophy and theology for researchers graduate and postgraduate students and practitioners alike *Thinking Through Twentieth-Century Architecture*

Nicholas Ray, 2023-02-08 Shortlisted for the Architectural Book Awards 2024 *Thinking Through Twentieth Century Architecture* connects the practice of architecture with its recent history and its theoretical origins those philosophical ideas that lay behind modernism and its aftermath By analyzing in straightforward and jargon free language the genesis of modernism and the complex reactions to it the book clarifies a continuing debate It has been specifically written to connect issues of theory history and contemporary practice and to allow students to make these connections easily This is a history of twentieth century architecture written with close critical attention to the theories that lie behind the works described Importantly unlike other historical accounts it does not take sides and urge the reader to identify with one

strand of thinking or style of architecture at the expense of others but it presents a dispassionate view with persuasive arguments on behalf of different positions It pursues the history of European and American architecture chronologically but the history is interwoven with the philosophical ideas that informed both writers and architects and are essential for its understanding The book is relevant to current issues of contemporary practice and education showing that philosophical issues are fundamental and those relating to design decisions never go away It includes 200 illustrations and will appeal to all those interested in twentieth century architecture and to architectural students

Philosophical Hermeneutics and the Architecture of Álvaro Siza Sally J. Faulder,2024-12-30 This book presents an original study of the work of Pritzker Prize winning Portuguese architect lvaro Siza from the perspective of architecture as an interpretation of human life It combines philosophical hermeneutics narrative textual description and history and theory research to provide a rich account of Siza s work The book gives a detailed analysis of three of Siza s works from this perspective the Tidal Pool Piscina das Mar s in Le a da Palmeira Portugal the Galician Centre of Contemporary Art Centro Galego de Arte Contempor nea in Santiago de Compostela Spain and the Santa Maria Church in Marco de Canaveses Portugal This form of analysis provides insight into the unique temporal dimension of Siza s work both in the memory inscribed by the structure and in how what is inscribed is revealed by degrees to those who come into contact with it Drawing on Hans Georg Gadamer and Paul Ricoeur this book defines both building and inhabiting as acts of interpretation Through employing the technique of writing architecture as a mode of phenomenological description the book uses one form of creative configuration narrative to draw out the meaning inscribed in another form of creative configuration architecture The book contributes a unique perspective to scholarship on Siza and an in depth study to the growing field of hermeneutics of architecture It will be of interest to researchers and students of architecture and philosophy

Philosophy for Architects Branko Mitrovic,2012-03-20 Philosophy for Architects is an engaging and easy to grasp introduction to philosophical questions of interest to students of architectural theory Topics include Aristotle s theories of visual imagination and their relevance to digital design the problem of optical correction as explored by Plato Hegel s theory of zeitgeist and Kant s examinations of space and aesthetics among others Focusing primarily on nineteenth and twentieth century philosophy it provides students with a wider perspective concerning philosophical problems that come up in contemporary architectural debates

The Everyday in Visual Culture François Penz,Janina Schupp,2022-05-30 This book explores how the comparative analysis of visual cultural artefacts from objects to architecture and fiction films can contribute

to our understanding of everyday life in homes and cities around the globe Investigating the multiple facets of the everyday this interdisciplinary collection generates a new awareness of everyday lives across cultures and challenges our traditional understanding of the everyday by interweaving new thematic connections It brings together debates around the analysis of the everyday in visual culture more broadly and explores the creation of innovative technological methods for comparative approaches to the study of the everyday such as film databases as well as the celebration of the everyday in museums The volume is organized around four key themes It explores the slices of everyday lives found in Visual Culture Part I Museums Part II the City Part III and the Home Part IV The book explores the growing area of the analysis of everyday life through visual culture both broadly and in depth By building interdisciplinary connections this book is ideal for the emerging community of scholars and students stemming from Visual Culture Film and Media Studies Architecture Studies and practice Museum Studies and scholars of Sociology and Anthropology as well as offering fresh insights into cutting edge tools and practices for the rapidly growing field of Digital Humanities **Manila** Marya Svetlana T. Camacho,2016

Interpretation in Architecture Adrian Snodgrass,Richard Coyne,2013-05-13 Drawing on cultural theory phenomenology and concepts from Asian art and philosophy this book reflects on the role of interpretation in the act of architectural creation bringing an intellectual and scholarly dimension to real world architectural design practice For practising architects as well as academic researchers these essays consider interpretation from three theoretical standpoints or themes play edification and otherness Focusing on these the book draws together strands of thought informed by the diverse reflections of hermeneutical scholarship the uses of digital media and studio teaching and practice A Study of Ottoman Narratives on Architecture Selen Bahriye Morkoç,2010 It is widely accepted that documents on Ottoman architects are rare and that little is known about the architectural practice in the Ottoman world A group of texts that have appeared between sixteenth and eighteenth centuries however form an exception to this general assumption While these texts have been cited and referred to in diverse previous studies on Ottoman architecture they have not been the topic of a major interpretative approach before A Study of Ottoman Narratives on Architecture Text Context and Hermeneutics is the first interpretive and comparative research monograph to feature these texts as its main theme This is the first translation of these works that contextualizes and interprets their importance in English The first text is a group of five documents that date back to the sixteenth century They comprise memoirs and building lists written in prose and verse which belonged to prominent Ottoman architect Sinan The second text was written under the influence of the first group of documents and is in a similar format It comprises a memoir dedicated to Sedefkar Mehmed A a who worked as the chief imperial architect in the seventeenth century and also provides information on architectural terms and makes comparisons between architecture and music The third text is different from the first two it is a monograph about the Selimiye Mosque written in prose in the eighteenth century by Dayezade Mustafa who was a complete outsider to architecture While the three texts have quite

different historical and thematic contexts their point in common is their rendering of architecture through narratives From a hermeneutical perspective the book compares narratives of the texts with contemporary historiography on Ottoman architecture History and Ideas Series No *Design Thinking* Peter G. Rowe,1991-02-14 In *Design Thinking* Peter Rowe provides a systematic account of the process of designing in architecture and urban planning He examines multiple and often dissimilar theoretical positions whether they prescribe forms or simply provide procedures for solving problems as particular manifestations of an underlying structure of inquiry common to all designing Over 100 illustrations and a number of detailed observations of designers in action support Rowe s thesis

Poetics in Architecture Leon van Schaik,2002-07-09 Can architecture directly engage with the inner experience of people Does it have universal or spiritual content Poetics in Architecture attempts to address these questions by looking at the essence of meaning of architecture and considering the human response to buildings Schaik s concern is that by focusing on technical refinements and new procedural models architects are in danger of alienating the collective human connections we make with buildings This title brings together the views of a fascinating and diverse group of architects and theoreticians from all over the world including Bolles Wilson Boyarsky Wilson Winka Dubbleddam Sean Godsell Mark Goulthorpe of dECOI and Tom Kovac

Pratt Journal of Architecture ,1988 **The Architects' Journal** ,1995 The Hermeneutics of Sacred Architecture Lindsay Jones,2000 The two volumes of this investigation into how we perceive sacred architecture propose an original interpretation of built environments as ritual architectural events Exploring the world s cultures and religious traditions Volume One maps out patterned responses to sacred architecture according to the human experience mechanism interpretation and comparison of architecture Volume Two an exercise in comparative morphology offers a comprehensive framework of ritual architectural priorities by looking at architecture as orientation as commemoration and as ritual context
