How the pieces move

Learn more: chess.com/terms/chess-pieces

THE PAWN

- If it is a pawn's first move, it can move forward one or two squares.
- After the first move, it can move forward just one square at a time.
- It attacks (or captures) each square diagonally to the left or right.

THE KNIGHT

The knight is the only piece in chess that can jump over another piece! It moves in an "L-shape."

THE BISHOP

The bishop can move diagonally as many squares as it likes, as long as it is not blocked by an occupied square. Therefore, each bishop only moves on the same color squares as the one it starts on.

THE ROOK

The rook can move as many squares as it likes horizontally or vertically as long as it is not blocked by an occupied square.

THE QUEEN

The queen is the most powerful piece. The queen can move like a rook or like a bishop.

THE KING

The king is the most important piece, however can only move one square in any direction.
