

The following policy template is for example purposes only. It contains the policy mandates that would be typical for a smaller merchant that has only point-of-sale (POS) terminals. Merchants who use this template should make modifications reflective of their specific operational environments. Merchants who have more sophisticated systems (for example: servers, printers, local area networks, etc.) will need to add additional policy mandates to ensure a comprehensive policy.

[Delete this disclaimer once the Merchant's Policy is written to reflect its specific environment]

[Merchant Name]

### Defining Sensitive Data

[Merchant Name] defines sensitive data as magnetic stripe data – information on the black strip located on the back of the card, such as the cardholder name, account number, or expiration date. Sensitive data also includes the personal identification number (PIN) of the cardholder and the three- or four-digit validation code located on the front or back of the card.

### Storage of Cardholder Data

It is the policy of [Merchant Name] that point-of-sale (POS) terminals used by [Merchant Name] will not store any cardholder data in electronic format.

It is policy that [Merchant Name] will not store any cardholder data in paper format.

For each existing POS terminal, [Merchant Name] will validate with its vendor or vendors whether any POS terminals store cardholder data.

It is policy that [Merchant Name] will not store, in any form, the card validation code (CVC) or card verification value (CVV) – the three- or four-digit number printed on the front or back of a payment card – used to verify card-not-present transactions.

It is policy that [Merchant Name] will not store the PIN or the encrypted PIN block.

It is policy that the primary account number (PAN) will be masked when displayed. On the receipt, only the first six or last four digits will be displayed. **Please Note:** These values are usually blocked out with an asterisk (\*) or an X.

### Paper Reports and Receipts

It is the policy of [Merchant Name] that all paper receipts or reports generated from all POS terminals be properly secured from unauthorized access.
