**Innovating Victory** Vincent O'Hara, Leonard R Heinz, 2022-04-15 *Innovating Victory Naval Technology in Three Wars* studies how the world's navies incorporated new technologies into their ships their practices and their doctrine It does this by examining six core technologies fundamental to twentieth century naval warfare including new platforms submarines and aircraft new weapons torpedoes and mines and new tools radar and radio Each chapter considers the state of a subject technology when it was first used in war and what navies expected of it It then looks at the way navies discovered and developed the technology's best use in many cases overcoming disappointed expectations It considers how a new technology threatened its opponents not to mention its users and how those threats were managed *Innovating Victory* shows that the use of technology is more than introducing and mastering a new weapon or system Differences in national resources force mixtures priorities perceptions and missions forced nations to approach the problems presented by new technologies in different ways Navies that specialized in specific technologies often held advantages over enemies in some areas but found themselves disadvantaged in others Vincent P O'Hara and Leonard R Heinz present new perspectives and explore the process of technological introduction and innovation in a way that is relevant to today's navies which face challenges and questions even greater than those of 1904 1914 and 1939

**The Modern Cruiser** Robert C. Stern, 2020-03-30 An entertaining and informative review of the evolution of one of the most important classes of warship from the technology of WWII into the missile age *Firetrench Cruisers* probably vary more in their characteristics than any other warship type and have certainly been subject to the most convoluted development There was always a basic tension between quantity and quality between numbers and unit size but at a more detailed level every one of the naval powers made different demands of their cruiser designers This makes the story of cruiser evolution in the world's major navies fascinating but complex This book sets out to provide a coherent history of the fortunes of this ship type in the twentieth century beginning with a brief summary of development before the First World War and an account of a few notable cruiser actions during that conflict that helped define what cruisers would look like in the post war world The core of the book is devoted to the impact of the naval disarmament treaty process which concentrated to a great extent on attempting to define limits to the numbers and size of cruisers that could be built in the process creating the treaty cruiser as a type that had never existed before and that existed solely because of the treaty process How the cruisers of the treaty era performed in the Second World War forms the final focus of this interesting well written and well grounded book which concludes with a look at the fate of the cruiser type since 1945 *Warship International* The result is probably the best single volume account of the subject to date
