Knowing how to click a picture does not make anyone a photographer. There are tools and techniques which need to be mastered before using a DSLR camera. A person using a smartphone to take pictures need not know anything about Aperture or Shutter Speed same for a person using a Point and Shoot camera because even if you know the technical stuff those cameras simply don't have the function to adjust it but if you have purchased a DSLR camera you definitely need to know all the functions and buttons on your camera because shooting in auto mode doesn't give you the fun of shooting and after all why you purchased a DSLR if you want to shoot only in Auto. If you are using DSLR for first time you might be overwhelmed with the numerous buttons and dials on the camera. Well In this book we try to make those buttons and dials less complicated and easier for you to understand. This book is divided into various sections explaining basics of camera 1 Introduction 2 History Of Photography 3 Camera Sensors 4 Resolution PPI and DPI 5 Medium Format Cameras 6 Shutter Speed etc. Please note this is not a complete Fashion photography guide. This book covers only the camera handling part of Fashion Photography. Since this is for aspiring fashion photographers many techniques and camera basics needed for other genres of photography like landscape wildlife has been omitted.
