Peacekeeping operations. How and under which criteria can we assess whether they are successful? Carolina Gerwin, 2019-12-09 Essay from the year 2019 in the subject Politics Topic Public International Law and Human Rights grade 8 4 Leiden University language English abstract Based on a case study analysis of the Mission des Nations Unies pour la stabilisation en Haiti MINUSTAH the essay answers the question of how and under which criteria one can assess whether peacekeeping operations are successful The paper shows that while the criteria of short term analyses are the most prominent ones in the literature they are not universally applicable and that there is a need to establish common criteria for the assessment of peacekeeping missions that focus on the long term consequences of such missions Regarding the success of MINUSTAH it is concluded that it was neither a full success

Assessing Success In United Nations Peace Operations Alexander Bezeau, 2018 The international community has long relied on United Nations UN peace operations as the means of creating and maintaining international peace and security however the realities of what a successful mission looks like remains obscured as the experiences and definitions of success may differ between the various players involved While a shared definition of success and operational structure remains elusive it is clear that the assessment of UN missions must be conducted in a holistic manner from mandate crafting to mission transition and exit Among these realities is that the assessment of UN peace operation success is all too often hindered by political partiality with the determination of mission success frequently held hostage by faulty political processes It is essential that evaluative frameworks encompass the various stages of a peace operation in order to illustrate the political challenges that often obstruct the planning and assessment of a UN mission Highlighting the political obstacles associated with holistic mission planning and assessment against the backdrop of ongoing ad hoc UN peace operation deployments to Haiti breaks down existing normative positions and exposes the realities and voids in current methodology
