Complex Predicates Cross Linguistic Perspectives On Event Structure:

Complex Predicates Mengistu Amberber, Brett Baker, Mark Harvey, 2010-04-22 Complex predicates are multipredicational but monoclausal structures They have proven problematic for linguistic theory particularly for proposed distinctions between the lexicon morphology and syntax This volume focuses on the mapping from morphosyntactic structures to event structure and in particular the constraints on possible mappings The volume showcases the coverb construction a complex predicate construction which though widespread has received little attention in the literature The coverb construction contrasts with more familiar serial verb constructions The coverb construction generally maps only to event structures like those of monomorphemic verbs whereas serial verb constructions map to a range of event structures differing from those of monomorphemic verbs The volume coverage is truly cross linguistic including languages from Australia Papua New Guinea Southeast Asia the Indian subcontinent East Africa and North America The volume establishes a new arena of research in event structure syntax and cross linguistic typology

Complex Predicates Mengistu Amberber, Brett Joseph Baker, Lecturer in Linguistics Brett Baker, Mark Harvey, 2014-05-14 Provides a fresh perspective on the cross linguistic properties of complex predicates considering how additional words contribute to the overall meaning

The Handbook of Persian Dialects and Dialectology Alireza Korangy, Behrooz Mahmoodi-Bakhtiari, 2025-02-24 This innovative investigative and expansive handbook covers a multitude of angles through which the intricacies of Persian and its many dialects and accents can be examined and parsed with the view of understanding better the devices and paths through which language and cultural cognizance operate in tandem As the first book in English to engage Persian dialects and dialectology on a broad and comprehensive scale it develops an understanding of the paths through which maximization of the expressive power of words exists in Persian under the rubric of cultural conceptualizations An insightful and all encompassing resource for analyzing and augmenting knowledge of Persian linguistics this work presents a thorough and all encompassing interdisciplinary treatment of Persian It is a vital

resource for socio and cultural linguists as well as anthropologists and Iranists It is also an excellent reference for historians researching Persian civilization culture literature and art

Case Studies from Austronesia, the Pacific, the Americas, and Theoretical Outlook Andrej Malchukov, Bernard Comrie, 2015-09-14 Earlier empirical studies on valency have looked at the phenomenon either in individual languages or a small range of languages or have concerned themselves with only small subparts of valency e g transitivity ditransitive constructions leaving a lacuna that the present volume aims to fill by considering a wide range of valency phenomena across 30 languages from different parts of the world The individual language studies each written by a specialist or group of specialists on that language and covering both valency patterns and valency alternations are based on a questionnaire reproduced in the volume and an on line freely accessible database thus guaranteeing comparability of cross linguistic results In addition introductory chapters provide the background to the project and discuss its main characteristics and selected results while a series of featured articles by leading scholars who helped shape the field provide an outside perspective on the volume s approach The volume is essential reading for anyone interested in valency and argument structure irrespective of theoretical persuasion and will serve as a model for future descriptive studies of valency in individual languages

Associated Motion Antoine Guillaume, Harold Koch, 2021-03-08 This volume is the first book length presentation of the grammatical category of Associated Motion It provides a framework for understanding a grammatical phenomenon which though present in many languages has gone unrecognized until recently Previously known primarily from languages of Australia and South America grammatical AM marking has now been identified in languages from most parts of the world except Europe and is becoming an important topic in linguistic typology The chapters provide a thorough introduction to the subject discussion of the relation between AM and related grammatical concepts detailed descriptions of AM in a wide range of the world s languages and surveys of AM in particular language families and areas

Semantic Spaces of Persian Light Verbs Neiloufar Family, 2014-11-27 In *Semantic Spaces of Persian Light Verbs* Neiloufar Family exposes the semantic organization of light verb constructions in Persian By clustering constructions based on semantic properties she provides an insightful and more global view of a system that has been notoriously difficult to classify Using diagrams as visual aids Neiloufar Family takes a novel bottom up approach to analysing the light verb system starting from small sets of constructions and mapping out consistent patterns Her analysis leads to a deeper understanding of the structure of semantic spaces within the verbal system in Persian and other languages that use light verbs This research provides a blueprint for understanding existing verbal constructions and productively creating new ones

Language, Biology and Cognition Prakash Mondal, 2019-07-17 This book examines the relationship between human language and biology in order to determine whether the biological foundations of language can offer deep insights into the nature and form of language and linguistic cognition Challenging the assumption in biolinguistics and neurolinguistics that natural language and linguistic cognition can be reconciled with neurobiology the author argues that

reducing representation to cognitive systems and cognitive systems to neural populations is reductive leading to inferences about the cognitive basis of linguistic performance based on assuming false dependencies. Instead he finds that biological implementations of cognitive rather than the biological structures themselves are the driver behind linguistic structures. In particular, this book argues that the biological roots of language are useful only for an understanding of the emergence of linguistic capacity as a whole but ultimately irrelevant to understanding the character of language. Offering an antidote to the current thinking embracing biologism in linguistic sciences, it will be of interest to readers in linguistics, the cognitive and brain sciences, and the points at which these disciplines converge with the computer sciences.

The Oxford Handbook of Event Structure Robert Truswell, 2019-03-26. This handbook deals with research into the nature of events and how we use language to describe events. The study of event structure over the past 60 years has been one of the most successful areas of lexical semantics, uniting insights from morphology and syntax, lexical and compositional semantics, cognitive science, and artificial intelligence to develop insightful theories of events and event descriptions. This volume provides accessible introductions to major topics and ongoing debates in event structure research, exploring what events are, how we perceive them, how we reason with them, and the role they play in the organization of grammar and discourse. The chapters are divided into four parts: the first covers metaphysical issues related to events; the second is concerned with the relationship between event structure and grammar; the third is a series of crosslinguistic case studies; and the fourth deals with links to cognitive science and artificial intelligence more broadly. The book is strongly interdisciplinary in nature, with insights from linguistics, philosophy, psychology, cognitive science, and computer science, and will appeal to a wide range of researchers and students from advanced undergraduate level upwards.

The Languages and Linguistics of Australia Harold Koch, Rachel Nordlinger, 2014-08-19. *The Languages and Linguistics of Australia: A Comprehensive Guide* is part of the multi-volume reference work on the languages and linguistics of the continents of the world. The volume provides a thorough overview of Australian languages, including their linguistic structures, their genetic relationships, and issues of language maintenance and revitalisation. Australian English, Aboriginal English, and other contact varieties are also discussed.

Second or foreign language learning and cognitive development Dingfang Shu, Jinfen Xu, Hui Zhang, 2024-01-11. *A Grammar of (Western) Garrwa* Ilana Mushin, 2012. Mushin provides the first full grammatical description of Garrwa, a critically endangered language of the Southwest Gulf of Carpentaria region in Northern Australia. Garrwa is typologically interesting because of its uncertain status in the Australian language family, its pronouns, and its word order syntax. This book covers Garrwa phonology, morphology, and syntax, with a particular focus on the use of grammar in discourse. The grammatical description is supplemented with a word list and text collection, including transcriptions of ordinary conversation.

A Grammar of Bilinarra Felicity Meakins, Rachel Nordlinger, 2014. Biographical note: Felicity Meakins, University of Queensland; Rachel Nordlinger, University of Melbourne.

Polish Psychological Verbs at the Lexicon-syntax Interface in Cross-linguistic

Perspective Adam Biały,2005 This book is a comparative study of Polish psychological verbs The analysis concentrates on the lexicon syntax interface of psych verbs and constitutes an argument in favour of its strong dependence on event structure The aim of this study is to show that the class of Polish psych verbs as in many other languages is not uniform The analysed subclasses are differentiated on the basis of their causation and stativity The marriage of those semantic traits and their structural representation is possible only if it is performed via event structure configuration a layer which appears to underlie the conceptualisation of events
