Children Institute of Medicine, Board on Health Sciences Policy, Committee on Clinical Research Involving

Children, 2004-07-09 In recent decades advances in biomedical research have helped save or lengthen the lives of children around the world With improved therapies child and adolescent mortality rates have decreased significantly in the last half century Despite these advances pediatricians and others argue that children have not shared equally with adults in biomedical advances Even though we want children to benefit from the dramatic and accelerating rate of progress in medical care that has been fueled by scientific research we do not want to place children at risk of being harmed by participating in clinical studies Ethical Conduct of Clinical Research Involving Children considers the necessities and challenges of this type of research and reviews the ethical and legal standards for conducting it It also considers problems with the interpretation and application of these standards and conduct concluding that while children should not be excluded from potentially

beneficial clinical studies some research that is ethically permissible for adults is not acceptable for children who usually do not have the legal capacity or maturity to make informed decisions about research participation The book looks at the need for appropriate pediatric expertise at all stages of the design review and conduct of a research project to effectively implement policies to protect children It argues persuasively that a robust system for protecting human research participants in general is a necessary foundation for protecting child research participants in particular *The Ethics of Unlocking Research with Children* Sam Frankel, Susan Kay-Flowers, 2025-10-16 Exploring how ethical decision making has become limited by institutional understandings of children as objects or subjects within a research process chapters invite us to reimagine a process in which child centred practices are at the centre of encouraging a more fluid and relational method of managing risks and vulnerabilities *Life-Span Human Development* Elizabeth A.
