The report begins with a statistical data review of young entrepreneurship from a labour market perspective based on analysis of self-employment data from the 1991-1996 Census of Canada and data from the Statistics Canada Labour Force Survey. It then provides a detailed analysis of the quantitative research focussing on current attitudes towards various business endeavours, business-related issues, as well as noting differences between the entrepreneur/non-entrepreneur groups. This is followed by in-depth results from the qualitative phase which focussed on current young entrepreneur programs, how these programs can be improved. The final part contains information on the survey methodology. Appendices include copies of the survey questionnaires, interview protocols, along with tabulations of results.
