Criminal Behavior James Hennessy, 2018-02-06 Crime Statistics suggest that Americans are not a notably law abiding people With some 13 million felonies reported every year it is not surprising that few topics engage public attention and imagination more compellingly than the dynamics of criminal behavior Volume and ubiquity alone might suggest the psychology of criminal behavior is well understood and there exists an integrated body of explanatory theory and empirical evidence But in fact only fragmentary and incomplete accounts have thus far appeared Criminal Behavior is virtually unique in providing a comprehensive psychological paradigm that fits across variant species of crime while meeting the requirements of science and the needs of law enforcement and administration of justice in controlling criminal behavior The authors begin this remarkable text by outlining a model for criminal behavior based not on abnormal psychology but on the tenets of social learning theory They illuminate the processes by which criminal activity is initiated and repeated including personal constructs stimulus determinants and behavioral repertoires They define four process elements that interact in precipitating criminal behavior inclination opportunity expectation of reward expectation of impunity They show how these process elements are regulated and confined by a series of complex and variable boundary conditions in specific criminal offenses Conceptual methodological and operational constraints on the study of criminal behavior are defined and statistically and behavioral science data bearing upon larceny and homicide two crimes at diametric extremes are examined in detail Pallone and Hennessy locate and define those psychological variables that render comprehensible the process whereby formally criminal acts are construed as possible and desirable by individual actors and show how those actors self select psychosocial environments that facilitate or at least do not impede the commission of crime

They identify and explain the phenomenon of tinderbox violence Its comprehensive perspective and balanced consideration of competing viewpoints make Criminal Behavior an ideal text for students and teachers of criminology and of the psychology of criminal behavior It is also a pioneering work for psychologists sociologists criminologists and law enforcement official

Chaiken, Marcia R. Chaiken, 1982  
Analysis of self report and official record data obtained from nearly 2 200 male prison and jail inmates in California Michigan and Texas shows that offenders can be usefully classified according to the combinations of crimes they commit The most serious inmates those who concurrently commit robbery assault and drug dealing disproportionately commit these defining crimes at high rates They often commit burglaries thefts and other crimes at high rates too frequently at higher rates than other types of criminals including those who specialize in those crimes Unfortunately information currently available from such sources as official arrest and conviction records do not permit criminal justice officials to distinguish meaningfully between these high rate serious offenders and other types Much better distinctions can be made using potentially available information on key characteristics multiple drug use unstable employment juvenile use of hard drugs and violence before the age of 16 The Classification of Criminal Behavior ,1973 *Different Crimes, Different Criminals* Doris Layton MacKenzie, Lauren O'Neill, Wendy Povitsky, Summer Acevedo, 2010-05-28 This book focuses on the importance of incorporating both sociological and psychological viewpoints in the understanding of criminal behavior It identifies and explains emerging criminal offenders within the criminal justice system examining the individual differences that make different types of offenders unique Text supported with charts tables and boxed inserts *Criminal Behavior* Walter C.
