Loose-Leaf Version for Evolution Douglas J. Emlen, Carl Zimmer, 2019-08 Life's Edge Carl Zimmer, 2021-03-09 FINALIST FOR THE PEN E O WILSON LITERARY SCIENCE WRITING AWARD A NEW YORK TIMES NOTABLE BOOK OF 2021 A SCIENCE NEWS FAVORITE BOOK OF 2021 A SMITHSONIAN TOP TEN SCIENCE BOOK OF 2021 Stories that both dazzle and edify This book is not just about life but about discovery itself Siddhartha Mukherjee New York Times Book Review We all assume we know what life is but the more scientists learn about the living world from protocells to brains from zygotes to pandemic viruses the harder they find it is to locate life's edge Carl Zimmer investigates one of the biggest questions of all What is life The answer seems obvious until you try to seriously answer it Is the apple sitting on your kitchen counter alive or is only the apple tree it came from deserving of the word If we can't answer that question here on earth how will we know when and if we discover alien life on other worlds The question hangs over some of society's most charged conflicts whether a fertilized

egg is a living person for example and when we ought to declare a person legally dead Life s Edge is an utterly fascinating investigation that no one but one of the most celebrated science writers of our generation could craft Zimmer journeys through the strange experiments that have attempted to re create life Literally hundreds of definitions of what that should look like now exist but none has yet emerged as an obvious winner Lists of what living things have in common do not add up to a theory of life It s never clear why some items on the list are essential and others not Coronaviruses have altered the course of history and yet many scientists maintain they are not alive Chemists are creating droplets that can swarm sense their environment and multiply Have they made life in the lab Whether he is handling pythons in Alabama or searching for hibernating bats in the Adirondacks Zimmer revels in astounding examples of life at its most bizarre He tries his own hand at evolving life in a test tube with unnerving results Charting the obsession with Dr Frankenstein s monster and how the world briefly believed radium was the source of all life Zimmer leads us all the way into the labs and minds of researchers engineering life from scratch

Feathered Marvels Dominic F. Sherony,Randi Minetor,2024-01-22 From the discovery of the fossil Archaeopteryx to more than 10 000 different documented species today birds have become the second most diversified class of vertebrates on Earth Birds have evolved extensively since they first emerged in prehistoric times but that diversity could dwindle and even vanish unless we take steps to conserve their habitats ensuring that they sustain their numbers and their variety This natural history of birds starts in the distant past going back to the Jurassic Cretaceous and Paleogene periods in order to get a broader understanding of the birds that we see today Chapters cover their lives breeding flight migration and more while also highlighting some especially unique bird fossils such as the Pelagornis Sandersi which had a wingspan of more than 20 feet Also included are chapters on the loss of needed habitats the current decline of native birds and what can be done to reverse it

concept to another area of evolutionary biology could necessitate a very different definition. Spotting these conceptual difficulties and presenting alternate theoretical interpretations that alleviate this incompatibility, Massimo Pigliucci and Jonathan Kaplan intertwine scientific and philosophical analysis to produce a coherent picture of evolutionary biology. Innovative and controversial, *Making Sense of Evolution* encourages further development of the Modern Synthesis and outlines what might be necessary for the continued refinement of this evolving field.
