Ex Formation Kenya Hara:

Ex-formation Kenya Hara, 2015 For Kenya Hara design begins with comprehension of the unknown In contrast to information exformation describes how little we really know and thus becomes the starting point for any type of design Based on a range of projects the book describes what exformation can look like in design practice and how this conceptualizes our classic understanding of information design Following the path embarked on in *Designing Design* 2007 and its successor *White* 2010 Ex formation continues to explore the void absence and indeterminacy in contemporary design *118 Theories of Design[ing]* Paul A. Rodgers, Craig Bremner, 2021-04-06 Theories normally seek to explain something 118 Theories of Design ing asks us to question those explanations By focusing on a broad range of somewhat overlooked and undervalued essays papers book articles words terms authors and phenomena that swirl around design ing the reader is encouraged to read reflect and question everything This original book will appeal to a global market of university faculty heads and deans museum directors design educators design researchers key design practitioners publishers members of the design media and undergraduate postgraduate and post doctoral students of design **Nonlinear** Kevin G. Bethune, 2025-02-04 From the acclaimed designer and bestselling author of *Reimagining Design* a nonlinear approach to navigating design s nuances in pursuit of meaningful innovation In *Nonlinear* Kevin Bethune shows us that we can reject trodden paths of digital or physical product creation by taking advantage of a nonlinear approach To unlock meaningful innovation that breeds new and novel outcomes he writes teams need to embark on a journey into the proverbial forest of ambiguity the result of a rapidly converging dynamic and exponentially changing landscape The journey is less about getting it right or wrong and more about using the information we have at our disposal to understand our choices and unlock new learning *Nonlinear* begins by taking the reader through Bethune s professional zigs and zags The author explains that while his interdisciplinary leaps were rare at the time he took them these varied experiences unlocked perspectives about design and innovation that uniquely prepared him for our present moment and for the future He then showcases the role of quantitative information to strategically frame and set boundary conditions for our creative exploration and he highlights the role of qualitative insights to provide the substance necessary to begin crafting solutions that address unmet needs The book also identifies accelerants or flywheels that will help readers as they reflect on their journey through the forest of ambiguity with a specific emphasis on diversity a key theme for Bethune a Black man who has navigated new horizons Readers will enjoy having the chance to customize the author s perspectives and make them their own at both an individual and a team level **The Design of Care** Craig Bremner, Paul A. Rodgers, Giovanni Innella, Justin Magee, 2025-11-28 This edited volume explores notions of care that are overlooked or neglected for one reason or another featuring projects that examine the most common forms of care mostly health and social care in a new light Chapters cover new ground from overlooked histories of care to caring for the future from economies and the commodification of care to equitable care from anarchic care to the choreography of care from

proposing a policy for empathy to questioning whether design really needs empathy at all and much more The book shows that design is well situated to bring forward in theory and in practice a care of the possible in view of what can be prevented and in the same gesture of what can be invented about the future of care The book will be of interest to scholars working in product design service design information design sustainable design and user centred user experience design Design for the Unthinkable World Craig Bremner,Paul A. Rodgers,Giovanni Innella,2024-02-13 This edited book contests that if design's raison d'être is to make things better then the object of design has always been remains and can only be a changed world and our relationship to it the world for us Each chapter was written by carefully selected researchers and practitioners who span geographical disciplinary and methodological boundaries in their work Contributors skilfully examine the case that while this once might have been seen to be a worthy objective how else to effect a preferred state and or pursue the project for the better world now the role of designing must cease to service design for change in the manner in which it has been doing Chapters explore how designing itself might change to explore the possibilities that might exist for the design of what might not become in an unthinkable world what Eugene Thacker calls a world without us This world without us does not mean a world devoid of humans or an interstellar world but a world we project that continues to revolve around the sun but no longer revolves around us This book will be of interest to scholars working in design research design ecology product design service design experience design architecture and information design **Arts-Based Methods in Education Around the World** Xiangyun Du,Tatiana Chemi,2022-09-01 Arts Based Methods in Education Around the World aims to investigate arts based encounters in educational settings in response to a global need for studies that connect the cultural inter cultural cross cultural and global elements of arts based methods in education In this extraordinary collection contributions are collected from experts all over the world and involve a multiplicity of arts genres and traditions These contributions bring together diverse cultural and educational perspectives and include a large variety of artistic genres and research methodologies The topics covered in the book range from policies to pedagogies from social impact to philosophical conceptualisations They are informative on specific topics but also offer a clear monitoring of the ways in which the general attention to the arts in education evolves through time Akushisu ,2006 Evolution of African Mammals Vincent J.
