Clark, 2012-12-06 Of all the components that go into electronic equipment the printed circuit probably requires more manufacturing operations each of which must be performed by a skilled person than any other As a shift supervisor early in my printed circuit career I had to hire and train personnel for all job functions The amount of responsibility delegated to my subordinates depended strictly on how well I had been able to train them Training people can be a trying experience and is always a time consuming one It behooved me to help my workers obtain the highest degree of job understanding and skill that they and I were capable of One hindrance to effective teaching is poor continuity of thought for example having to say to a trainee Wait a minute forget what I just told you We have to go back and do something else first It was in trying to avoid pitfalls such as this that I undertook a detailed examination of the processes involved what I thought each trainee had to know and what questions they would most frequently ask From this analysis I developed the various process procedures Only after I had done so was I able to train effectively and with the confidence that I was doing the best possible job Answers had to be at hand for all of their questions and in whatever detail they needed to know Worksheets for Drafting and Design , 2008 The Planning Guide to Piping Design Richard Beale, Paul Bowers, 2017-10-22 The Planning Guide to Piping Design Second Edition covers the entire process of managing and executing project piping designs from conceptual to mechanical completion also explaining what roles and responsibilities are required of the piping lead during the process The book explains proven piping design methods in step by step processes that cover the increasing use of new technologies and software Extended coverage is provided for the piping lead to manage piping design activities which include supervising planning scheduling evaluating manpower monitoring progress and communicating the piping design
