

How Carlini's form only  
 seem to move  
 you and show  
 1971 in the 1971-72  
 of the 1971-72

In the drawing Carlini shows you how to draw the figure in terms  
 of simple forms. He used blocks to study the torso and neck planes and the hip  
 and knee planes. He has shown a light from the left and from above. Thus, if  
 we were to try to do so, we would get the side and down planes. If we had drawn  
 perfectly like the figure and put the same light and shade on them, they would  
 have looked very well.

Even in this study the figure, Carlini will show his movement of drawing. The  
 line 141 suggests the top of the torso.

There is another principle easily learned here. As the artist moves his attention  
 from one block to the next to another, he notes the direction of each form. In other  
 words, he notes how to draw each part.
