the chapters in this handbook provide both retrospective and contemporary views and commentaries by leading and knowledgeable scholars in the field who offer unique insights on the changing role of accounting and auditing in today's data and analytics driven environment. Aimed at academics, practitioners, students and consultants in the areas of accounting, auditing and other business disciplines, the handbook provides high level insight into the design, implementation and working of big data and data analytics practices for all types of organizations worldwide. The leading scholars in the field provide critical evaluations and guidance on big data and data analytics by illustrating issues related to various sectors such as public, private, not for profit and social enterprises. The handbook's content will be highly desirable and accessible to accounting and non-accounting audiences across the globe.
