

3. Press the play button and then click on the Macro-Scale simulation option.

4. Move the blue "Charge 1" slider to -10; move the red "Charge 2" slider to +10.

5. " q_1 " and " q_2 " represent two charged objects. The white arrows are force vectors that indicate the direction and magnitude (size) of the force on the charged object.

6. Move q_1 and q_2 closer together and farther apart:

Experiment 1: Describe what happens to the arrows and people.

7. Move the blue "Charge 1" slider to -10; move the red "Charge 2" slider to -10.

8. Move q_1 and q_2 closer together and farther apart:

Experiment 2: Describe what happens to the arrows and people.

Question 1: In which experiment were the objects repelling one another, and in which experiment were the objects attracting to each other?

The objects were repelling one another when I set the slider for q_1 and q_2 to -10. The objects were attracted to each other when I set the slider for q_1 to -10 and q_2 to +10.

Question 2: Compare the forces on the two charged objects.

The magnitudes of the force are: (choose one) **the same**

The direction of the forces are: (choose one) **the opposite**

9. Let's explore what affects the magnitude (size) of the forces. Set the charge values for q_1 and q_2 as instructed in the tables below, then set the distance between the charges to either 3 cm or 10cm as instructed in the tables below (It does not matter where on the ruler q_1 and q_2 are just make sure they are either 3cm or 10cm apart). Determine the magnitude of the force for both charges for each cell in the table. Report the forces to two decimal places.
