Couples Family Therapy Clinical Practice:

Couples and Family Therapy in Clinical Practice Ira D. Glick, Douglas S. Rait, Alison M. Heru, Michael Ascher, 2015-10-26
Couples and Family Therapy in Clinical Practice has been the psychiatric and mental health clinician's trusted companion for over four decades. This new fifth edition delivers the essential information that clinicians of all disciplines need to provide effective family centered interventions for couples and families. A practical clinical guide, it helps clinicians integrate family systems approaches with pharmacotherapies for individual patients and their families. *Couples and Family Therapy in Clinical Practice* draws on the authors' extensive clinical experience as well as on the scientific literature in the family systems, psychiatry, psychotherapy, and neuroscience fields.

Doing Family Therapy Robert Taibbi, 2022-01-23
Engaging, practical, and infused with clinical wisdom, this widely used text and practitioner guide helps therapists working with families to hit the ground running. The revised and updated fourth edition brings fresh insights into the issues families bring to therapy and the therapist's moment-to-moment decision making. Rather than advocating one best approach, Robert Taibbi shows that there are multiple ways to guide parents, children, and adolescents and harness their strengths. The beginning, middle, and end stages of treatment are richly illustrated with chapter-length case examples. End-of-chapter learning exercises help readers build key skills and creatively develop their own clinical style. New to This Edition: All chapters revised with new case studies throughout; Sidebars on common challenges facing new clinicians; self-doubt, the emotional experience of working with distressed families, and more; Increased attention to what the therapist can say and do to actively shape each session; Heightened focus on process helping families explore the how of problem solving as much as the what. See also the author's *Doing Couple Therapy: Second Edition: Craft and Creativity in Work with Intimate Partners*.

[Family Therapy in Clinical Practice](#) Murray Bowen, 1985
When Bowen was a student and practitioner of classical psychoanalysis at the Menninger Clinic, he became engrossed in understanding the process of schizophrenia and its relationship to mother-child symbiosis. Between the years 1950 and 1959 at Menninger and later at the National Institute of Mental Health as first chief of family studies, he worked clinically with over 500 schizophrenic families. This extensive experience was a time of fruition for his thinking as he began to conceptualize human behavior as emerging from within the context of a family system. Later at Georgetown University Medical School, Bowen worked to extend the application of his ideas to the neurotic family system. Initially, he saw his work as an amplification and modification of Freudian theory, but later viewed it as an evolutionary step toward understanding human beings as functioning within their primary network, their family. One of the most renowned theorists and therapists in the field of family work, this book encompasses the breadth and depth of Bowen's contributions. It presents the evolution of Bowen's Family Theory from his earliest essays on schizophrenic families and their treatment through the development of his concepts of triangulation, intergenerational conflict, and societal regression, and culminating in his brilliant exploration of the differentiation of one's self in one's family of origin.
