Python Web Scraping Katharine Jarmul, Richard Lawson, 2017-05-30 Successfully scrape data from any website with the power of Python 3 x About This Book A hands on guide to web scraping using Python with solutions to real world problems Create a number of different web scrapers in Python to extract information This book includes practical examples on using the popular and well maintained libraries in Python for your web scraping needs Who This Book Is For This book is aimed at developers who want to use web scraping for legitimate purposes Prior programming experience with Python would be useful but not essential Anyone with general knowledge of programming languages should be able to pick up the book and understand the principals involved What You Will Learn Extract data from web pages with simple Python programming Build a concurrent crawler to process web pages in parallel Follow links to crawl a website Extract features from the HTML Cache downloaded HTML for reuse Compare concurrent models to determine the fastest crawler Find out how to parse JavaScript dependent websites Interact with forms and sessions In Detail The Internet contains the most useful set of data ever assembled most of which is publicly accessible for free However this data is not easily usable It is embedded within the structure and style of websites and needs to be carefully extracted Web scraping is becoming increasingly useful as a means to gather and make sense of the wealth of information available online This book is the ultimate guide to using the latest features of Python 3 x to scrape data from websites In the early chapters you ll see how to extract data from static web pages You ll learn to use caching with databases and files to save time and manage the load on servers After covering the basics you ll get hands on practice building a more sophisticated crawler using browsers crawlers and concurrent scrapers You ll determine when and how to scrape data from a JavaScript dependent website using PyQt and Selenium You ll get a better understanding of how to submit forms on complex websites protected by CAPTCHA You ll find out how to automate these actions with Python packages such as mechanize You ll also learn how to create class based scrapers with Scrapy libraries and implement your learning on real websites By the end of the book you will have explored testing websites with scrapers remote scraping best practices working with images and many other relevant topics Style and approach This hands on guide is full of real life examples and solutions starting simple and then progressively becoming more complex Each chapter in this book introduces a problem and then provides one or more possible solutions *Handbook of Semantic Web Technologies* John Domingue, Dieter Fensel, James A. Hendler, 2011-06-19 After years of mostly theoretical research Semantic Web Technologies are now reaching out into application areas like bioinformatics eCommerce eGovernment or Social Webs Applications like genomic ontologies semantic web services automated catalogue alignment ontology matching or blogs and social networks are constantly increasing often driven or at least backed up by companies like Google Amazon YouTube Facebook LinkedIn and others The need to leverage the potential of combining information in a meaningful way in order to be able to benefit from the Web will create further demand for and interest in Semantic Web research This movement based

on the growing maturity of related research results necessitates a reliable reference source from which beginners to the field can draw a first basic knowledge of the main underlying technologies as well as state of the art application areas This handbook put together by three leading authorities in the field and supported by an advisory board of highly reputed researchers fulfils exactly this need It is the first dedicated reference work in this field collecting contributions about both the technical foundations of the Semantic Web as well as their main usage in other scientific fields like life sciences engineering business or education

Trellix Web Corbin Collins,2001 Gail hates the wind But her Mother has the perfect solution a beautiful new kite The book includes information on how wind is created and why it is important Includes instructions and patterns for making a simple kite
