## EKG AND HEART RHYTHM FLASHCARDS

**Third-Degree Blocked signal**

**Description:** No atrial impulses reach the ventricles.  
**EKG:** No relationship between P waves and QRS complexes; ventricles beat independently.  
**Significance:** Medical emergency; usually requires a pacemaker.

The flashcard includes an illustration of a person with a starburst indicating a medical emergency, and a diagram of a heart with a blocked signal path.

The bundle branches further divide into Purkinje fibers, which spread the impulse through the ventricles, causing the ventricular myocardium to depolarize and contract.

**QRS Complex Formation:**  
As the ventricles depolarize, this electrical activity is recorded as the QRS complex on the EKG.

The flashcard includes an illustration of the heart showing the bundle of His and Purkinje fibers, and a small EKG trace.
