Capital Cost Estimates Understanding Analyzing And Evaluating:

Capital Cost Estimates - Understanding, Analyzing, and Evaluating Thomas E. Wolf, 2011-06-08 Refining and petrochemical project management personnel most without estimating background are required to understand analyze and determine validity of complex cost estimates prepared by others How is the non estimator already overloaded with work to be done ever to find the time much less the required resources to become sufficiently competent to meet this requirement This book is specifically designed and written as a desktop resource for this individual In addition to presenting an organized approach to analyzing cost estimates summarized results of decades long historical cost data collection is presented providing needed assistance to answer the crucial question of is this estimate reasonable **GAO Cost Estimating and Assessment Guide** Barry Leonard, 2009-11 To use public funds effectively the gov t must meet the demands of today s changing world by employing effective mgmt practices and processes including the measurement of gov t program performance Legislators gov t officials and the public want to know whether gov t programs are achieving their goals and what their costs are To make those evaluations reliable cost information is required and fed standards have been issued for the cost accounting that is needed to prepare that information This Cost Guide has been developed in order to establish a consistent methodology that is based on best practices and that can be used across the fed gov t for developing managing and evaluating capital program cost estimates Illustrations **Mineral Property Evaluation** Richard L. Bullock, Scott Mernitz, 2017-12-01 Everything sums up what must be considered for a properly documented property evaluation Less than 30% of the projects that are developed in the minerals industry yield the return on investment that was projected from the project feasibility studies The tools described in this handbook will greatly improve the probability of meeting your projections and minimizing project execution capital cost blowout that has become so prevalent in this industry in recent years Mineral Property Evaluation provides guidelines to follow in performing mineral property feasibility and evaluation studies and due diligence and in preparing proper documents for bankable presentations It highlights the need for a consistent systematic methodology in performing evaluation and feasibility work The objective of a feasibility and evaluation study should be to assess the value of the undeveloped or developed mineral property and to convey these findings to the company that is considering applying technical and physical changes to bring the property into production of a mineral product The analysis needs to determine the net present worth returned to the company for investing in these changes and to reach that decision point as early as possible and with the least amount of money spent on the evaluation study All resources are not reserves nor are all minerals an ore The successful conclusion of any property evaluation depends on the development work and conclusions of the project team The handbook has a diverse audience Professionals in the minerals industry that perform mineral property evaluations Companies that have mineral properties and perform mineral property feasibility studies and evaluations or are buying properties based on property evaluation Financial institutions both domestic

and overseas that finance or raise capital for the minerals industry Consulting firms and architectural and engineering contractors that utilize mineral property feasibility studies and need standards to follow And probably the most important the mining and geological engineering students and geology and economic geology students that need to learn the standards that they should follow throughout their careers

Program Evaluation Robert L. Schalock, C.V.D. Thornton, 2013-11-11 This book is written to help human service program administrators either in interpret or conduct program evaluations Our intended audience includes administrators and those students being trained for careers in human services administration Our focus is on persons interested in assessing programs in which people work with people to improve their condition The book's title Program Evaluation A Field Guide for Administrators describes how we hope you use this book as a tool In writing the book we have attempted to meet the needs of persons who have to conduct program evaluations as well as those who must use those evaluations Hence we have attempted to make the book user friendly You will find for example numerous guidelines cautions and specific suggestions Use the book actively Our primary motive is to help administrators make better decisions In fact the primary reason for program evaluation is to help program administrators make good decisions These decisions often must balance the goals of equity or fairness in the distribution of goods and services among people in the economy efficiency obtaining the most output for the least resources and political feasibility Take for example the administrator who must decide between a new program favored by some of the program's constituents and maintaining the status quo which is favored by other constituents
