**Acute Coronary Care 1987** Robert M. Califf,G.S. Wagner,2012-12-06 During the 25 years since acute coronary care was focused into Coronary Care Units there have been three major Phases I prevention of death caused by arrhythmias II prevention of death due to myocardial failure and III limitation of infarct size In the latter two Phases there has been infringement upon the time honored concept of a prolonged period of rest for the patient in general and the heart in particular to minimize myocardial metabolic demands During the second Phase of coronary care patients with myocardial failure received aggressive measures to increase cardiac work via increase in preload decrease in afterload and direct increase in inotropy It was believed that true cardiogenic shock was so irreversible that it should be prevented by vigorous efforts to improve the cardiac output despite the risk of extending the area of ischemic myocardium However Phase II produced minimal overall reduction in mortality In the initial part of Phase III myocardial infarct MI size limitation was attempted by reducing myocardial metabolic demands via either beta adrenergic or calcium channel blocking agents We are currently several years into the second part of Phase III of coronary care where the principle means of limiting MI size is restoration of coronary blood flow

Aviles, 2010-09-20 The staff in every catheterization laboratory in the world participates in some form of hazing. Although largely benign and expected, this ritual can place even more stress on an already unsettled and insecure newcomer. The first edition of this manual was spearheaded by cardiology fellows who remembered well what it was like to enter the cath lab for the first time. Now several years later, these hazees have in many cases become the hazers, but the additional experience and responsibility has allowed for a more comprehensive and updated manual. Our goal is to produce a thoroughly practical and easily accessible manual for physicians, physicians in training, nurses, cath lab x-ray techs, mid-level providers, and students. Since we have been subjected to years of questions, first from our mentors and now from our students, we are acutely familiar with the most pertinent and necessary data for any student, no matter the level of training. The manual remains specifically designed with an easy-to-read format that includes highlighted pearls, updated American College of Cardiology, American Heart Association, ACC, AHA guidelines, numerous visuals including carefully delineated schematics of standard coronary projections, and special troubleshooting notes that provide potential solutions for frequently encountered problems.
