Office of Management and Budget, 2015 *Golden Years?* Deborah Carr, 2019-01-22 Thanks to advances in technology medicine Social Security and Medicare old age for many Americans is characterized by comfortable retirement good health and fulfilling relationships But there are also millions of people over 65 who struggle with poverty chronic illness unsafe housing social isolation and mistreatment by their caretakers What accounts for these disparities among older adults Sociologist Deborah Carr's *Golden Years* draws insights from multiple disciplines to illuminate the complex ways that socioeconomic status race and gender shape the nearly every aspect of older adults lives By focusing on an often invisible group of vulnerable elders *Golden Years* reveals that disadvantages accumulate across the life course and can diminish the well being of many Carr connects research in sociology psychology epidemiology gerontology and other fields to explore the well being of older adults On many indicators of physical health such as propensity for heart disease or cancer black seniors fare worse than whites due to lifetimes of exposure to stressors such as economic hardships and racial discrimination and diminished access to health care In terms of mental health Carr finds that older women are at higher risk of depression and anxiety than men yet older men are especially vulnerable to suicide a result of complex factors including the rigid masculinity expectations placed on this generation of men Carr finds that older adults physical and mental health are also closely associated with their social networks and the neighborhoods in which they live Even though strong relationships with spouses families and friends can moderate some of the health declines associated with aging women and especially women of color are more likely than men to live alone and often cannot afford home health care services a combination that can be isolating and even fatal Finally social inequalities affect the process of dying itself with white and affluent seniors in a better position to convey their end of life preferences and use hospice or palliative care than their disadvantaged peers Carr cautions that rising economic inequality the lingering impact of the Great Recession and escalating rates of obesity and opioid addiction among other factors may contribute to even greater disparities between the haves and the have nots in future cohorts of older adults She concludes that policies such as income supplements for the poorest older adults expanded
