EQUITY IN COVID-19 Anika Altaf, Dzodzi Tsikata, Gertrude Dzifa Torvikey, Marleen Dekker, 2024-09-25 This Open Access edited volume presents twelve African case studies that systematically reconstruct document and analyse how national governments and other stakeholders took equity into account in their initial policy responses to the COVID 19 pandemic At the onset of the pandemic many African governments acted quickly to suppress the virus through various public health measures including lockdowns mobilizing healthcare resources and designing responses to support the economy and the population There were however significant variations in the severity and type of measures taken as well as their accessibility and impacts Equity was not a given and therefore important questions have been raised about who benefitted and who were left unprotected from the interventions particularly those designed to protect income and basic services The book based on a variety of empirical data and disciplinary perspectives of research teams from across the continent examines the inclusivity of mitigation and policy responses It situates these findings on short term interventions and impact in debates about the longer term implications of the COVID 19 pandemic on the development of the African continent and proposes new directions for policy research and practice in responses and interventions during crises
