## **Exercises In Epidemiology Applying Principles And Methods:**

*Exercises in Epidemiology* Noel S. Weiss, 2016-10-12 Traditional epidemiology coursework is centered on the design and analysis of disease control. This important knowledge forms the backbone of what epidemiology is but it can sometimes become a rote exercise in calculations rather than what it can and should be training in thinking like an epidemiologist. EXERCISES IN EPIDEMIOLOGY enriches the core epidemiology coursework with a set of living breathing problems from the real world epidemiology literature. Comprising nearly 200 questions and answers drawn from published studies, this one of a kind text allows students in epidemiology and public health to cultivate their skills in a real world context while familiarizing themselves with core epidemiologic principles: rates and proportions, causal inference and confounding. Answers to every question along with each step in the reasoning that supports them are included so that students can compare notes with a senior epidemiologist. With its practical, analytically sophisticated approach to this vital subject matter, EXERCISES IN EPIDEMIOLOGY prepares readers to make the transition from student to professional like no other text. **Teaching**

**Epidemiology** Jørn Olsen, Naomi Greene, Rodolfo Saracci, Dimitrios Trichopoulos, 2015-03-26 Teaching epidemiology requires skill and knowledge combined with a clear teaching strategy and good pedagogic skills. The general advice is simple: if you are not an expert on a topic, try to enrich your background knowledge before you start teaching. The new edition of *Teaching Epidemiology* helps you to do this and by providing world expert teachers' advice on how best to structure teaching, providing a unique insight into what has worked in their hands. This book will help you to tailor your own epidemiology teaching programme. The fourth edition of this established text has been fully revised and updated, drawing on new research findings and recently developed methods, including research technologies in genetic epidemiology and method development in relation to causal analysis. Analytical tools provide teachers in the field with the skills to guide students at both undergraduate and postgraduate levels. Each chapter in *Teaching Epidemiology* comprises key concepts in epidemiology, subject specific methodologies and disease specific issues to provide expert assistance in the teaching of a wide range of epidemiology courses.
