*Chasing Technoscience* Don Ihde, Evan Selinger, 2003-06-18 *Chasing Technoscience* is a ground breaking state of the art look at current developments in technoscience *Chasing Technoscience* Don Ihde, Evan Selinger, 2003 Through lively personal interviews and substantive essays the ideas of Andrew Pickering Don Ihde Donna Haraway and Bruno Latour are brought to bear on the question of materiality in technoscience The work of these theorists is then compared and critiqued in essays by colleagues *Postphenomenology* Evan Selinger, 2012-02-01 *Postphenomenology* is the first book devoted exclusively to the interpretation and advancement of prominent phenomenologist Don Ihde s landmark contributions to history philosophy sociology science sound studies and technology studies Ihde has made a direct and lasting impact on the study of technological experience across the disciplines and acquired an international following of diverse scholars along the way many of whom contribute to *Postphenomenology* including Albert Borgmann who characterizes Ihde as being among the most interesting and provocative contemporary American philosophers The contributors situate assess and apply Ihde s philosophy with respect to the primary themes that his oeuvre emphasizes They not only clarify Ihde s work but also make significant contributions to the philosophy of technology phenomenology hermeneutics and the philosophy of science A comprehensive response from Ihde concludes the volume *Science, Technology and Society* Wenceslao J. González, 2005 The emphasis on the realm of Science Technology and Society or Science and Technology Studies may have the same degree of relevance that the historical turn had in the past It is a social turn which affects philosophy of science as well as philosophy of technology It includes a new vision of the aims processes and results of scientific activities and technological doings because the focus of attention is on several aspects of science and technology which used to be considered as secondary or even irrelevant This turn highlights science and technology as social undertakings rather than intellectual contents According to this new vision there are several important changes as to what should be studied the objects of research how it should be studied the method and what the consequences for those studies are The new focus of attention can be seen in many changes and among them are several of special interest a from what science and technology are in themselves mainly epistemic contents to how science and technology are made largely social constructions b from the language and structure of basic science to the characteristics of applied science and the applications of science c from technology as a feature through which human beings control their natural surroundings a step beyond technics due to the contribution of science to technology as a social practice and an instrument of power and d from the role of internal values necessary for mature science and innovative technology to the role of contextual or external values cultural political economic of science and technology Wenceslao J Gonzalez is professor of logic and philosophy of science at the University of A Coru a Spain He has been vicedean of the School of Humanities and president of the Committee of Doctoral Programs at the University He has been a visting researcher at the Universities of St Andrews M nster and London London School of

Economics as well as Visiting fellow at the Center for Philosophy of Science University of Pittsburgh He has given lectures at the Universities of Pittsburgh Stanford Quebec and Helsinki The conferences in which he has participated include those organized by the Universities of Uppsala New South Wales Bologne and Canterbury New Zealand He has edited 20 volumes and published 70 papers He is the editor of the monographic issues on Philosophy and Methodology of Economics 1998 and Lakatos s Philosophy Today 2001 His writings include Economic Prediction and Human Activity An Analysis of Prediction in Economics from Action Theory 1994 On the Theoretical Basis of Prediction in Economics 1996 Rationality in Economics and Scientific Predictions A Critical Reconstruction of Bounded Rationality and its Role in Economic Predictions 1997 Lakatos s Approach on Prediction and Novel Facts 2001 Rationality in Experimental Economics An Analysis of R Selten s Approach 2003 From Erkl renVerstehen to PredictionUnderstanding The Methodological Framework in Economics 2003 and The Many Faces of Popper s Methodological Approach to Prediction 2004

**Computation, Information, Cognition** Gordana Dodig Crnkovic, Susan Stuart, 2009-03-26 This book draws together a number of important strands in contemporary approaches to the philosophical and scientific questions that emerge when dealing with the issues of computing information cognition and the conceptual issues that arise at their intersections It discovers and develops the connections at the borders and in the interstices of disciplines and debates and presents a range of essays that deal with the currently vigorous concerns of the philosophy of information ontology creation and control bioinformation and biosemiotics computational and post computational approaches to the philosophy of cognitive science computational linguistics ethics and education

*The Philosophy of Expertise* Evan Selinger, Robert P. Crease, 2006 From the use of expert testimony in the courtroom to the advice we rely on to solve key economic political and social problems expertise is an essential part of our decision making process However the extent to which experts can be trusted is a subject of persistent and contentious debate *The Philosophy of Expertise* is the first collection to explore the fundamental philosophical issues surrounding these authorities and their expert knowledge Part 1 considers the problems surrounding the issue of trust and deference part 2 launches a phenomenological clarification of expertise that pinpoints the universal structures embodied in cognition and affect and part 3 examines the consequences of the social and technical externalization of expertise Contributors including Edward Said Alvin Goldman Peter Singer Hubert Dreyfus Julia Annas Harry Collins and Don Ihde draw on a number of intellectual approaches to explore the justification of expert authority the potentially dangerous role of expertise in a liberal democratic society how laypeople can critique experts and the social and ideological character of expert advice The contributors also discuss the reasoning process of judges and juries the ancient Greek view of moral conduct and the incorporation of experts into governmental bureaucracy By honestly tackling the legitimacy and consistency of various positions this volume sheds much needed light on the theoretical dimensions of a controversial and pervasive practice Contributors Alvin I Goldman Don Ihde Edward Said Evan Selinger and John Mix Evan Selinger and Robert P Crease H M Collins and Robert Evans H l ne

*French Philosophy of Technology* Sacha Loeve,Xavier Guchet,Bernadette Bensaude Vincent,2018-05-28 Offering an overall insight into the French tradition of philosophy of technology this volume is meant to make French speaking contributions more accessible to the international philosophical community The first section Negotiating a Cultural Heritage presents a number of leading 20th century philosophical figures

from Bergson and Canguilhem to Simondon Dagonnet or Ellul and intellectual movements from Personalism to French Cybernetics and political ecology that help shape philosophy of technology in the Francophone area and feed into contemporary debates ecology of technology politics of technology game studies The second section Coining and Reconfiguring Technoscience traces the genealogy of this controversial concept and discusses its meanings and relevance A third section Revisiting Anthropological Categories focuses on the relationships of technology with the natural and the human worlds from various perspectives that include anthropotechnology Anthropocene technological and vital norms and temporalities The final section Innovating in Ethics Design and Aesthetics brings together contributions that draw on various French traditions to afford fresh insights on ethics of technology philosophy of design techno aesthetics and digital studies The contributions in this volume are vivid and rich in original approaches that can spur exchanges and debates with other philosophical traditions *Science-fiction Studies*, 2006 **Reconfiguring Spanish Subjects** Monika A. Szumilak, 2005

**Reconfiguring the Archaeological Sensibility** Timothy Aaron Webmoor, 2007 **Maya Ethnicity** Frauke Sachse, 2006 **Technoscience in Contemporary Film** Aylish Wood, 2002 This book provides an accessible introduction to contemporary ideas about technoscience and broadens the debates about images of science and technology beyond the science fiction and horror genres into an alternative body of films fictions of technoscience [Technoscience and Everyday Life](#) Mike Michael, 2006-09 This book traces the multiple ways in which technoscience features in and affects the dynamics of everyday life and explores how the everyday influences the course of technoscience In the process it takes account of a range of core social scientific themes body identity citizenship society space and time It combines critique and microsocial analysis to develop several novel conceptual tools and addresses key contemporary theoretical debates on posthumanism social material divides process philosophy and complexity temporality and spatiality This book is a major contribution to the sociology of everyday life science and technology studies and social theory back cover **Historia**, 2003 **Multiple Field Approaches in the Mediterranean** Christopher Lorne Witmore, 2005 **Art in the Age of Technoscience** Ingeborg Reichle, 2009-08-21 Art the Life Sciences and the Humanities In Search of a Relationship Robert Ztuyjnenberg Over the last decades there has been a distinctive effort in the arts to engage with science through participation in the actual practice of science Exchange projects between artists and scientists such as artist in lab projects have become common and a large number of organizations have emerged that stimulate and initiate collaboration between artists and scientists Research funding organizations in the humanities such as the British Arts and Humanities Research Council AHRC and the Netherlands Organisation for Scientific Research NWO have also initiated all sorts of research programs that explore and support interactions between art and science As a result artists have grown more involved with scientific concerns and practices and their increased interactions with scientists have also become a subject of study within the humanities Why do artists openly seek to gain access to the domain of the sciences And why do scholars in the humanities value collaboration

between artists and scientists so much that they are willing to spend research time and money on it. This interest in science I argue in this preface for Ingeborg Reichle's book *Art in the Age of Technoscience* underscores that the arts and the humanities are searching to establish a new relationship with the natural sciences as well as with each other. Art and Science. The relationship between the arts and the sciences has been subject to permanent change over the past two centuries.

**Forthcoming Books** Rose Arny, 2003      **New Waves in Philosophy of Technology** Jan Kyrre Berg Olsen Friis, Evan Selinger, Søren Riis, 2009-01-15. This volume on the philosophy of technology collects new work by the most talented young philosophers in the subject. It is a unique collection that crosses the divide between analytic and continental philosophy, showing that the rising challenges and extraordinary new possibilities brought about by technological developments necessitate the emergence of new forms of critical philosophical reflection. Thought provoking and rigorous, this book will stimulate and direct further philosophical research for students and researchers in philosophy of science and technology.
