### Findout Constellations

**What:**  
There is a lot of stars that make up constellations. Learning to find constellations is an important skill for astronomers and stargazers. It helps them to know what they are looking at in the night sky.

**How:**  
You can use a star chart or the southern hemisphere star chart to find constellations. The sky is divided into 48 constellations. Each constellation has a different shape and size.

**Why:**  
The stars in constellations are connected by imaginary lines. This helps us to see the patterns of stars in the night sky.

**Where:**  
The stars in constellations are scattered all over the sky. Some are in the northern hemisphere and some are in the southern hemisphere.

**When:**  
The stars in constellations are visible all year long. Some are only visible in certain months.
