dinosaurs such as Apatosaurus Allosaurus and Stegosaurus But dinosaurs compose barely a third of the more than 90 types of vertebrates known from the formation which include crocodiles and turtles frogs and salamanders dinosaurs and mammals clams and snails and ginkgoes ferns and conifers Featuring nearly all new illustrations the second edition of this classic work includes new taxa named since 2007 updates to the naming and classifications of some old taxa and expanded sections on numerous aspects of Morrison Formation paleontology and geology

Journey of the Universe Brian Thomas Swimme, Mary Evelyn Tucker, 2011-06-28 The basis for the Emmy winning film A wonderful highly readable account of the history of the universe from the Big Bang through the present moment Thomas Lovejoy University Professor in Environmental Science and Policy George Mason University Through the astonishing combined achievements of natural scientists worldwide we now have a detailed account of how galaxies and stars planets and living organisms human beings and human consciousness came to be And yet we thirst for answers to questions that have haunted humanity from the very beginning What is our place in the 14 billion year history of the universe What roles do we play in Earth s history How do we connect with the intricate web of life on Earth In *Journey of the Universe* Brian Thomas Swimme and Mary Evelyn Tucker tell the epic story of the universe from an inspired new perspective weaving the findings of modern science together with enduring wisdom found in the humanistic traditions of the West China India and indigenous peoples The authors explore cosmic evolution as a profoundly wondrous process based on creativity connection and interdependence and they envision an unprecedented opportunity for the world s people to address the daunting ecological and social challenges of our times *Journey of the Universe* transforms how we understand our origins and envision our future Though a little book it tells a big story one that inspires hope for a way in which Earth and its human civilizations could flourish together What s most striking about Swimme and Tucker s work is a simple but beautiful assumption a cosmological orientation opens the human mind to wonder gratitude humility and creativity Orion
