Discourse on the Method of Rightly Conducting One's Reason and of Seeking Truth in the Sciences French *Discours de la Méthode* Pour bien conduire sa raison et chercher la vérité dans les sciences is a philosophical and autobiographical treatise published by René Descartes in 1637. It is best known as the source of the famous quotation *Je pense donc je suis* English *I think therefore I am* or *I am thinking therefore I exist* which occurs in Part IV of the work. A similar argument without this precise wording is found in *Meditations on First Philosophy* 1641 and a Latin version of the same statement *Cogito ergo sum* is found in *Principles of Philosophy* 1644.

Discours de la Méthode (Special French Edition) René Descartes,2017-01-17 *Le Discours de la méthode* sous-titré *Pour bien conduire sa raison et chercher la vérité dans les sciences* est le premier texte philosophique publié par René Descartes. La Haye le 8 juin 1637. Dans les premières éditions ce discours servait d'introduction à trois traités scientifiques mettant en application cette méthode : *La Dioptrique*, *Les Météores* et *La Géométrie*. Pour Descartes, il s'agit d'en dire assez pour faire juger que les nouvelles opinions qui se verraient dans la Dioptrique et dans les Météores n'étaient point contraires à la religion. Toutefois, sa clarté est devenue telle qu'il est désormais souvent publié seul comme un essai indépendant. *Descartes: An Intellectual Biography* Stephen Gaukroger,1995-03-30 René Descartes 1596-1650 is the father of modern philosophy and one of the greatest of all thinkers. This is the first intellectual biography of Descartes in English; it offers a fundamental reassessment of all aspects of his life and work. Stephen Gaukroger, a leading authority on Descartes, traces his intellectual development from childhood, showing the connections between his intellectual and personal life and placing these in the cultural context of seventeenth-century Europe. Descartes' early work in mathematics and science produced ground-breaking theories, methods, and tools still in use today. This book gives the first full account of how this work informed and influenced the later philosophical studies for which, above all, Descartes is renowned. Not only were philosophy and science intertwined in Descartes' life, so were philosophy and religion. The Church of Rome found Galileo guilty of heresy in 1633, two decades earlier Copernicus' theories about the universe had been denounced as blasphemous. To avoid such accusations, Descartes clothed his views about the relation between God and humanity and about the nature of the universe in a philosophical garb acceptable to the Church. His most famous project was the exploration of the foundations of human knowledge, starting from the proof of one's own existence offered in the formula *Cogito ergo sum* *I am thinking therefore I exist*. Stephen Gaukroger argues that this was not intended as an exercise in philosophical scepticism, but rather to provide Descartes' scientific theories influenced as they were by Copernicus and Galileo with metaphysical legitimation. This book offers for the first time a full understanding of how Descartes developed his revolutionary ideas. It will be welcomed by all readers interested in the origins of modern thought.

Discourse on the Method of Rightly Conducting One's Reason and of Seeking Truth in the Sciences René Descartes,1980 Excerpt from Discourse on the Method of Rightly Conducting the Reason and Seeking Truth in the Sciences Such an attitude would be impossible now the present age has a real past of science behind it But it was necessary then the past which lay directly behind Descartes with a few bright exceptions like Bruno and Campanella was a past of slavish submission to authority both in action and in thought and the utter demolition of this past was the self chosen task of the great recluse philosopher who believed he had stripped himself of every clog that the heritage of antiquity had placed upon man s intellect About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **Discours de la méthode de Descartes** René Descartes,1969*
