Western philosophy forever in the process *Discourse on the Method of Rightly Conducting the Reason, and Seeking Truth in the Sciences* René Descartes, 1903 Discourse on Method and Related Writings René Descartes, 1999-09-02 This is the second of a new two volume edition of the works of Descartes in Penguin Classics This volume is designed for students who approach Descartes from the point of view of his philosophy of science Includes DISCOURSE ON METHOD the most accessible and well known of his discussions of scientific method the first seven chapters of the earlier unpublished work THE WORLD as well as a selection of Descartes correspondence and his replies to his critics **Discourse on the Method** René Descartes, 1996-01-01 Descartes ideas not only changed the course of Western philosophy but also led to or transformed the fields of metaphysics epistemology physics and mathematics political theory and ethics psychoanalysis and literature and the arts This book reprints Descartes major works Discourse on Method and Meditations and presents essays by leading scholars that explore his contributions in each of those fields and place his ideas in the context of his time and our own There are chapters by David Weissman on metaphysics and psychoanalysis John Post on epistemology Lou Massa on physics and mathematics William T Bluhm on politics and ethics and Thomas Pavel on literature and art These essays are accompanied by others by David Weissman and by Stephen Toulmin that introduce the idea of intellectual lineages discuss the period in which Descartes wrote and reexamine the premises of his philosophy in light of contemporary philosophical political and social thinking **Rene Descartes** René Descartes, 2017-01-05 Rene Descartes Discourse on the Method of Rightly Conducting the Reason and Seeking Truth in the Sciences by Rene Descartes The Discourse on the Method French Discours de la methode is a philosophical and autobiographical treatise published by René Descartes in 1637 Its full name is Discourse on the Method of Rightly Conducting One's Reason and of Seeking Truth in the Sciences French title Discours de la methode pour bien conduire sa raison et chercher la verité dans les sciences The Discourse on The Method is best known as the source of the famous quotation Je pense donc je suis I think therefore I am which occurs in Part IV of the work Good sense is of all things among men the most equally distributed for every one thinks himself so abundantly provided with it that those even who are the most difficult to satisfy in everything else do not usually desire a larger measure of this quality than they already possess And in this it is not likely that all are mistaken the conviction is rather to be held as testifying that the power of judging aright and of distinguishing truth from error which is properly what is called good sense or reason is by nature equal in all men and that the diversity of our opinions consequently does not arise from some being endowed with a larger share of reason than others but solely from this that we conduct our thoughts along different ways and do not fix our attention on the same objects For to be possessed of a vigorous mind is not enough the prime requisite is rightly to apply it The greatest minds as they are capable of the highest excellences are open likewise to the greatest aberrations and those who travel very slowly may yet make far greater progress provided they keep always to the straight road than those who while they run forsake it A Discourse of a Method for the Well Guiding of Reason and the Discovery of Truth in the
