Disaster Planning for Special Libraries Guy Robertson, 2020-11-27 Disaster Planning for Special Libraries contains a guide for developing and maintaining disaster plans for small special libraries and related work units This volume serves as a reference resource not only for people who have never considered the disaster planning process but also for experienced planners interested in a variety of approaches to different aspects of planning The author discusses the role of

the special librarian in the planning process and considers the relationship between special libraries and their host organizations. He emphasizes the importance of coordinating a special library's plan with any in place for its host organization and encourages librarians to demonstrate their planning skills for organization-wide benefits. Early chapters summarize the initial phases of the planning process which include preparedness and response measures. Subsequent chapters cover the assessment of damage to special library facilities and assets, the implications of declaring a disaster, the development of strategic alliances with key suppliers, orientation and training, succession planning, operational resumption, the normalization of library operations, and auditing a disaster plan. The concluding chapter discusses concerns that special librarians might have with regard to the future and its risks. Appendices include examples of a risk assessment and analysis and a risk mitigation program, a strike and protest plan, an emergency equipment inspection and audit report, a pandemic management program, and a disaster response manager's kit. Presents essential information in an accessible manner. Considers the disaster-related needs and experiences of special library personnel. Discusses a variety of risks to special libraries in different kinds of physical locations. Offers different approaches to a broad range of disaster planning topics in special libraries. Provides examples of essential planning documentation.

Highlighting a range of pertinent topics such as digital libraries, information sciences, and academic libraries, this multi-volume book is ideally designed for academicians, researchers, practitioners, and librarians seeking current research on library science and administration.

Disaster Planning and Recovery Judith Fortson, 1992. This is a guide for librarians who need to make an immediate response to a disaster or to formulate a plan and take preventive measures. The more common disasters of fires, storms, floods, construction accidents, power failures, and earthquakes, which cause water damage, fire damage, or biopredation, are the main consideration here. The manual discusses disaster prevention from evaluating and upgrading the physical plant to assessment of collections, emphasizing storage. A step-by-step outline of what to include in a disaster plan covers personnel training, the availability of outside expertise, and a checklist of sources and supplies. The final chapters focus on disaster recovery and beyond, including insurance, treatment of damaged materials in various formats, and a discussion of new building ideas from a disaster prevention/recovery perspective.
