countries have experienced and many developing countries are going to experience The book will be useful not only to those who are interested in Japanese society and public policies but also to anyone who is interested in the transformations of families communities and roles of the state in a modern market economy Economic Analysis and Public Policy Mary J. Fox,1960 **Economic analysis and public policy** Mary Jean Bowman,1946 **Consumer Behaviour and Decision-Making from Officed- Based Doctors** Claudia Pitterle,2024 As individuals we face the challenge of making numerous decisions every day Although some of them are made consciously the majority are made unconsciously and automatically Poppel 2007 p 22 Especially in the insurance sector which is one of the more complex fields of decisionmaking these decisions have far reaching significance The discussion of risk protection and individual insurance demand is gaining in importance especially against the backdrop of climate change cyber attacks and global health crises such as the COVID 19 pandemic The literature research in the context of these interests revealed that studies and surveys in Germany Europe as well as in North America repeatedly identify structural insurance gaps and a tendency towards underinsurance This reveals systematic deviations from economically appropriate insurance coverage There is even talk of misinsurance due to incorrect

risk perception assessment and evaluation on the part of the policyholders From a behavioural economics perspective these patterns can be attributed to heuristics and cognitive biases that influence the decision making of the insured European Commission 2017 GDV 2020 GoslarInstitut 2016 Kunreuther et al 2013 Richter et al 2019 Based on these findings the commercial insurance coverage of doctors in private practice was evaluated and the demand for insurance was investigated Officed based doctors in Germany are central actors in the health care system and so far there is no specific study on their coverage behaviour The aim of the thesis was therefore to examine the officed based doctors behaviours towards professional safe guarding risks With a further objective to investigate the use of heuristics and identify factors indicating deviations from economically adequate insurance coverage to better understand manifested decision making behaviour
