The BIM Handbook presents the technology and processes behind BIM and how architects, engineers, contractors, and sub-contractors, construction and facility owners, AECO can take advantage of the new technology and work process. Unlike CAD, BIM is a major paradigm shift in the documentation, work processes, and exchange of project information. It facilitates collaboration and further automation in both design and construction. AEC professionals need a handbook to guide them through the various BIM technologies and related processes. The BIM Handbook reviews BIM processes and tools from multiple perspectives: the owner, architects and engineers, contractors, subcontractors, and fabricators.
