Peri-urban futures: Scenarios and models for land use change in Europe Kjell Nilsson, Stephan Pauleit, Simon Bell, Carmen Aalbers, Thomas A. Sick Nielsen, 2013-02-05 Presently peri urbanisation is one of the most pervasive processes of land use change in Europe with strong impacts on both the environment and quality of life It is a matter of great urgency to determine strategies and tools in support of sustainable development The book synthesizes the results of PLUREL a large European Commission funded research project 2007 2010 Tools and strategies of PLUREL address main challenges of managing land use in peri urban areas These results are presented and illustrated by means of 7 case studies which are at the core of the book This volume presents a novel future oriented approach to the planning and management of peri urban areas with a main focus on scenarios and sustainability impact analysis The research is unique in that it focuses on the future by linking quantitative scenario modeling and sustainability impact analysis with qualitative and in depth analysis of regional strategies as well as including a study at European level with case study work also involving a Chinese case study

The Security of Water, Food, Energy and Liveability of Cities Basant Maheshwari, Ramesh Purohit, Hector Malano, Vijay P. Singh, Priyanie Amerasinghe, 2014-06-13 The population of cities around the world is growing at an alarming rate and as a result the landscapes of most cities are going through enormous changes In particular fertile agricultural lands at the periphery of cities are being developed without consideration of holistic planning As such peri urban areas zones of transition from rural to urban land uses located between the outer limits of the urban and the rural environment are experiencing significant losses of agricultural land increased runoff and water quality degradation Concurrently the demands for water food and energy are increasing within cities and unless a balance is struck the liveability of these cities will soon be compromised The current water and land use changes have serious consequences on lifestyle environment health and overall well being of urban communities This book therefore helps readers to understand the current issues and challenges and examines suitable strategies and practices to cope with current and future pressures of urbanisation and peri urban land use changes The book examines a number of critical aspects in relation to the future of cities and peri urban regions including the suitability of policies and institutions to sustain cities into the future impact of current trends in land use change population increase and water demand long term planning needs and approaches to ensure the secured future for generations ahead and strategies to adapt the cities and land uses so that they remain viable and liveable The readership of the book will include policy makers urban planners researchers post graduate students in

urban planning and environmental and water resources management and managers in municipal councils **Australian National Bibliography: 1992** National Library of Australia, 1988 *Integrated Land Use and Environmental Models* Subhrajit Guhathakurta, 2013-06-29 This volume is the result of an invited symposium titled Integrated Land Use and Environmental Models A Survey of Current Applications and Research that was held in October 2000 at Arizona State University The idea for the symposium arose from a belief held by many academics that we are at the watershed of a new generation of models that are more dynamic more pragmatic more interdisciplinary and more amenable to collaborative decision making Several academics and professionals engaged in urban research had long realized that domain specific knowledge was inadequate for understanding and managing urban growth While interdisciplinary approaches have become critical in most social research one general area of knowledge that stands out as having the most wide ranging impact on current urban modeling efforts is the field comprised of environmental sciences and ecology The symposium offered a forum for academics and professionals engaged in urban and ecological modeling to exchange ideas and experiences specifically in areas that overlapped urban and environmental issues The contributions to this volume highlight the progress made in the various efforts to build integrated urban and environmental models More importantly each chapter shows how ideas have diffused across disciplinary boundaries to create better policy relevant models In addition this book outlines some promising areas of research that could make important contributions to the field of urban and environmental modeling Integrated thinking about urban and environmental issues has been fundamental to the concept of sustainability **Guiding Land Use Decisions** David Countryman, Denise M.
