When a net force acts on an object, the object's motion will change. This means that the object's speed or direction will change. However, if the net force is zero, the object's motion will not change. This means that the object will continue moving in the same direction at the same speed.</p> <p>Another way that forces can cause an object to change its motion is by changing its direction. This happens when a net force acts on an object that is moving in a straight line. The object will change its direction and continue moving in the new direction. This is called acceleration.</p> <p>Forces can also cause an object to change its motion by changing its speed. This happens when a net force acts on an object that is moving in a straight line.
