Off on a Comet! a Journey through Planetary Space Jules Verne, 2015-12-27 The story starts with a comet called Gallia that touches the Earth in its flight and collects a few small chunks of it The disaster occurred on January 1 of the year 188x in the area around Gibraltar On the territory that was carried away by the comet there remained a total of thirty six people of French eng Spanish and Russian nationality These people did not realize at first what had happened and considered the collision an earthquake They first noticed weight loss the adjutant of Captain Servadac Ben Zoof to his amazement jumped twelve meters high Zoof with Servadac also soon noticed that the alternation of day and night is shortened to six hours that east and west changed sides and that water begins to boil at 66 degrees Celsius from which they rightly deduced that atmosphere became thinner and pressure dropped At the beginning of their stay in Gallia they noticed the Earth with the Moon but thought it was an unknown planet Other important information was obtained through their research expedition with a ship which the comet also took During the voyage they discovered a mountain chain blocking the sea which they initially considered to be the Mediterranean Sea and then they found the island of Formentera before the catastrophe a part of the Balearic Islands where they found a French astronomer Palmyrin Rosette who helped them to solve all the mysterious phenomena They were all on the comet which was discovered by Rosette a year ago and predicted a collision course with Earth but no one believed the astronomer because a layer of thick fog at the time prevented astronomical observations in other places Excerpt from Wikipedia

Off on a Comet! Jules Verne, 1878 Comet Madness Richard J. Goodrich, 2023-02-15 Halley's Comet visits the earth every seventy five years Since the dawn of civilization humans had believed comets were evil portents In 1705 Edmond Halley liberated humanity from these primordial superstitions or so it was thought proving that Newtonian mechanics rather than the will of the gods brought comets into our celestial neighborhood Despite this scientific advance when Halley's Comet returned in 1910 and astronomers announced that our planet would pass through its poisonous tail newspapers gleefully provoked a global hysteria that unfolded with tragic consequences In *Comet Madness* author and historian Richard J Goodrich examines the 1910 appearance of Halley's Comet and the ensuing frenzy sparked by media manipulation bogus science and outright deception The result is a fascinating and illuminating narrative history that underscores how we behave in the face of potential calamity then and now As the comet neared Earth scientists and journalists alike scrambled to get the story straight as citizens the world over panicked Popular astronomer Camille Flammarion attempted to allay fears in a newspaper article but the media ignored his true position that passage would be harmless weather prophet Irl Hicks publisher of an annual pseudo scientific almanac announced that the comet would disrupt the world's weather religious leaders thumbed the Bible's Book of Revelation and wondered if the comet presaged the apocalypse Newspapers confident that there was gold in these alternate theories gave every crackpot a megaphone increasing circulation and stoking international hysteria As a result workmen shelved their tools farmers refused to plant crops they would never harvest and formerly reliable people stopped paying their creditors More opportunistic citizens opened comet insurance plans Others suffered mental breakdowns and some took their own lives *Comet Madness* reveals how humans confront the unknown how scientists learn about the world we inhabit and how certain people from outright hucksters to opportunistic journalists harness fear to produce a profit
