Comments For Teacher Evaluation:

cover Towards the implementation of formal formative assessment in inquiry-based science education in Switzerland
Regula Grob, 2016-06-29 Inquiry has been an important part of educational theory and practice for the last decades. As in other competence-oriented approaches to teaching and learning, the appropriate support and assessment of the students' competences has been much debated in the context of inquiry-based science education. One way to support and assess students in their learning is formative assessment. The concept is also known as assessment for learning, which means that the information on the students' levels of achievement is not used for grading but for planning the next steps in teaching and learning. The use of formative assessment methods as a means of support for students' learning is promoted in national and international position papers and reports. However, in the Swiss teaching practice, formative assessment, particularly formal formative assessment methods which involve a certain degree of pre-definition, planning, and formality, are not widely used nor researched. Therefore, the focus of this study is on exploring possibilities and challenges for the implementation of formal formative assessment methods in the context of inquiry-based science education in Switzerland. The emphasis of the study will be on the teacher perspective.

Handbook of Research on Writing Charles Bazerman, 2009-03-04 The Handbook of Research on Writing ventures to sum up inquiry over the last few decades on what we know about writing and the many ways we know it. How do people write? How do they learn to write and develop as writers? Under what conditions and for what purposes do people write? What resources and technologies do we use to write? How did our current forms and practices of writing emerge within social history? What impacts has writing had on society and the individual? What does it mean to be and to learn to be an active participant in contemporary systems of meaning? This cornerstone volume advances the field by aggregating the broad-ranging interdisciplinary, multidimensional strands of writing research and bringing them together into a common intellectual space. Endeavoring to synthesize what has been learned about writing in all nations in recent decades, it reflects a wide scope of international research activity with attention to writing at all levels of schooling and in all life situations. Chapter authors, all eminent researchers, come from disciplines as diverse as anthropology, archeology, typography, communication studies, linguistics, journalism, sociology, rhetoric, composition, law, medicine, education, history, and literacy studies. The Handbook's 37 chapters are organized in five sections: The History of Writing; Writing in Society; Writing in Schooling; Writing and the Individual; Writing as Text. This volume, in summing up what is known about writing, deepens our experience and appreciation of writing in ways that will make teachers better at teaching writing and all of its readers better as individual writers. It will be interesting and useful to scholars and researchers of writing to anyone who teaches writing in any context, at any level, and to all those who are just curious about writing.

Handbook on Teacher Evaluation with CD-ROM James Stronge, Pamela Tucker, 2020-10-14 Easy to use, authoritative, and flexible, the tools in this book and downloadable resources have been developed over the last 15 years and have been field-tested in over 500 schools. These

tools will empower you to do your evaluations based on current thinking and best practices

The Handbook for Enhancing Professional Practice Charlotte Danielson, 2008-09-15 Since the original publication of *Enhancing Professional Practice: A Framework for Teaching* in 1996, thousands of educators in the United States and around the world have used the framework and its clear definition of the components of good teaching to structure their professional conversations and guide their practice. Building on those diverse experiences, Charlotte Danielson now provides specific guidance for teacher educators, teachers, administrators, and others who seek to use the framework to improve their programs and practice. The *Handbook for Enhancing Professional Practice* offers sound advice, step-by-step procedures, and practical tools for using the framework in: Teacher preparation; Teacher recruitment and hiring; Teacher mentoring and peer coaching; Self-directed professional inquiry; Professional development; and Teacher evaluation. The ready-to-use forms and other instruments in this book transform the framework for teaching into a mechanism for teacher support that emphasizes two key goals: quality assurance and professional learning. Grounded in practitioners' wisdom, this handbook demonstrates how the framework for teaching can inform professional growth throughout a teacher's career, from preservice training through the attainment of the skills and knowledge that characterize distinguished teaching. Charlotte Danielson is an international education consultant and presenter based in Princeton, NJ.

Designing Effective Feedback Processes in Higher Education Naomi Winstone, David Carless, 2019-06-27 Feedback is one of the most powerful influences on student achievement, yet it is difficult to implement productively within the constraints of a mass higher education system. *Designing Effective Feedback Processes in Higher Education: A Learning Focused Approach* addresses the challenges of developing effective feedback processes in higher education, combining theory and practice to equip and empower educators. It places less emphasis on what teachers do in terms of providing commentary and more emphasis on how students generate, make sense of, and use feedback for ongoing improvement. Including discussions on promoting student engagement with feedback technology, enabled feedback, and effective peer feedback, this book contributes to the theory and practice of feedback in higher education by showcasing a new paradigm of feedback thinking focused on dialogue and student uptake. It synthesizes the evidence for effective feedback practice and provides contextualized examples of successful, innovative feedback designs analyzed in relation to relevant literature. Highlights the importance of staff and student feedback literacy in developing productive feedback partnerships. Supports higher education teachers in further developing their feedback practice. *Designing Effective Feedback Processes in Higher Education: A Learning Focused Approach* contributes to the theory and practice of higher education pedagogy by re-evaluating how feedback processes are designed and managed. It is a must-read for educators, researchers, and academic developers in higher education who will benefit from a guide to feedback research and practice that addresses well-recognized challenges in relation to assessment and feedback.
