Connecting Children to Nature Asher Cloran,2019-10-17 As a child my fondest memories were exploring in forests playing in creek beds finding groves of mushrooms digging in the dirt and building houses in trees Our connections and interactions with nature as we grow evolve and shape our bodies personality interests and passions in life Scientific research now shows how nature positively impacts our biology mental health learning and connections to the world and people around us Research also shows a decline in children s health learning sense of self and creativity that is correlated with the excessive use of technology and reduced time spent outdoors playing Now more than ever we must believe in the importance of sharing the gifts of nature and the love of nature with the world so they will care for what is most important the earth we live on the nature of our planet and our health and wellbeing This book has been written to give teachers and parents a solid foundation in the reasoning for nature connection and a toolkit full of ideas and tactics that will make nature connection with children stimulating educationally rewarding and life enriching for both the adult and the child The book condenses the scientific research on technology nature and how they impact childhood development and learning In a busy modern world that is ever changing it is important that parents and teachers are up to date and armed with the most relevant knowledge to deal with the culture the world that we are in the current challenges we face in science education and in the roles of parents mentors and teachers It is an easy to read practical guide that can help shape the way things are done in and out of the classroom to stimulate the creation of solid foundations for our children s connection to nature to flourish After all children deserve to have a lifelong loving and deep connection to the natural world around them so they can discover the magic of Life
