From the Local to the Global Gerard McCann, Stephen McCloskey, 2015-05-20 The international development sector has found itself confronting new challenges to poverty eradication and the promotion of human rights Climate change has loomed large as a crisis for development practitioners and environmentalists affecting the most vulnerable in the Global South The ongoing financial crisis has created recurrent recessions in the global North while causing budget lines to be reduced for development aid This textbook highlights the extent to which the local and global are interconnected in today's globalised economy It questions the legitimacy of the neoliberal model of development which propelled us into the crisis Including chapters on Latin America China and sub-Saharan Africa and topics such as debt injustice gender and migration this completely revised third edition takes stock of the international development environment as it embarks on new policy frameworks to confront new challenges

Problems, Promises, and Paradoxes of Aid J. Oloka-Onyango, Nicolas van de Walle, 2014-11-10 This book is an anthology of essays contributing new scholarship to the contemporary discourse on the concept of aid It provides an interdisciplinary investigation of the role of aid in African development compiling the work of historians political scientists legal scholars and economists to examine where aid has failed and to offer new perspectives on how aid can be made more effective Questions regarding the effectiveness of aid are addressed here using specific case studies The question of ownership is examined in the context of two debates 1 to what extent should aid be designed by the recipient country itself and 2 should aid focus on need or performance That is should donors direct aid to the poorest countries regardless of their policies and governance or should aid reward countries for doing the right thing The future of aid is also addressed should aid continue to be a part of the development agenda for countries in sub-Saharan Africa If so how much and what type of aid is needed and how it can be made most effective The major criticism against aid is that it cripples the recipient country's economic growth by turning it into a passive receiver in addition it has been noted that aid is mostly supply driven depending upon donors rather than the actual needs of recipients For this reason aid may not meet the goals for which it was intended To meet the needs of the communities they want to help donors should work through consultation and a measure of recipient ownership Donors need to understand context to protect human rights and to be guided by principles of social and

environmental justice Other suggested strategies for making aid more effective include peer review self assessment the empowerment of women encouraging accountability investing in agriculture helping smallholder subsistence farmers introducing ethical and professional standards for civil service and raising the competence of civil servants *Statistical Report* New York (N.Y.). Police Department,1931 *The Grateful Dead* Gordon Hall Gerould,1908 *The Teachers' Aid* ,1903 *Annual Report, Year Ending December 31 ...* New York (N.Y.). Police Department,1932 Sick, Not Dead James C. Riley,1997 The life expectancy of British workers rose dramatically during the nineteenth century a period when workingmen routinely began to consult doctors While rates of sickness fell the length of episodes of disease and injury became more protracted Instead of dying at relatively young ages workingmen survived longer and experienced more sickness In *Sick Not Dead* James C Riley traces these developments and examines the arrangements made for providing medical care to workers Drawing on the work attendance and sick visit records of British friendly societies Riley explores how these organizations provided workingmen with access to doctors and regulated compensation for wages lost due to sickness He finds in this period the roots of today s doctor patient relationship In the 1870s when a small number of patients could choose among a relatively large number of doctors patients demanded and got frequent and convenient consultations for low fees But in the 1890s working people sacrificed their advantage as the number of patients increased they began accepting their doctors excuses for care they previously had rejected as inattentive or deficient In the 1910s and 1920s the doctors improved their own organization and used it to seize control of the fee schedule Using the extensive claims records of the societies Riley also explores the regional patterns of sickness in Britain from 1870 to 1910 and addresses the question of how policies that promoted lower mortality affected rates and duration of sickness **Financial Statement of the State Board of Education and State Aid to Public Schools** Minnesota.
