Code Associations Fondations 2016 Comment:

Greek and Roman Painting and the Digital Humanities Marie-Claire Beaulieu, Valérie Toillon, 2021-11-29 This volume is a groundbreaking discussion of the role of digital media in research on ancient painting and a deep reflection on the effectiveness of digital media in opening the field to new audiences The study of classical art always oscillates between archaeology and classics between the study of ancient texts and archaeological material For this reason it is often difficult to collect all the data to have access to both types of information on an equal basis The increasing development of digital collections and databases dedicated to both archaeological material and ancient texts is a direct response to this problem The book's central theme is the role of the digital humanities especially digital collections such as the Digital Milliet in the study of ancient Greek and Roman painting Part 1 focuses on the transition between the original print version of the Recueil Milliet and its digital incarnation Part 2 addresses the application of digital tools to the analysis of ancient art Part 3 focuses on ancient wall painting The book will be of interest to scholars working in art history classics archaeology and digital humanities

Uniform Rules for European Contract Law? Francisco de Elizalde, 2018-06-28 Over the last 30 years the evolution of *acquis communautaire* in consumer law and harmonising soft law proposals have utterly transformed the landscape of European contract law The initial enthusiasm and approval for the EU programme has waned and post Brexit it currently faces increasing criticism over its effectiveness In this collection leading academics assess the project and ask if such judgements are fair and suggest how harmonisation in the field might be better achieved This book looks at the uniform rules in the context of the internal market national legislators and courts bridging the gap between common and civil law and finally their influence on non member states Critical and rigorous it provides a timely and unflinching critique of one of the most important fields of harmonisation in the European Union

The Colonization of Names Benjamin C. Brower, 2025-08-19 French colonization dismantled Algerian names Under the occupation that began in 1830 not only were Algerian towns and streets renamed in honor of French figures but personal names were forced to follow French conventions and norms Colonial authorities simplified and transformed Algerian names to suit their administrative and legal purposes crudely transcribing and transliterating Arabic and Berber They imposed a two part name and surname model that stripped away the extended family ties and social context

inherent to precolonial naming practices This groundbreaking history of personal names in nineteenth century Algeria sheds new light on the symbolic violence of renaming and the relationship between language and colonialism Benjamin Claude Brower traces the changes Algerians personal names suffered during the colonial era and the consequences for individuals and society France s imposition of new names he argues destabilized Algerians sense of self and place in the community distorted local identities and compromised institutions such as the family Drawing on previously unstudied records Brower examines different northwestern African naming traditions and how colonialism changed them With the aid of literary and critical theory he develops new insights into the name and its relationship to power and subjectivity A rigorous theoretical and historical account of symbolic violence *The Colonization of Names* unveils many unseen forms of harm under colonial rule

The Mononuclear Phagocyte System in Infectious Disease Geanncarlo Lugo-Villarino,Céline Cougoule,Etienne Meunier,Yoann Rombouts,Christel Vérollet,Luciana Balboa,2019-10-04 The Mononuclear Phagocyte System MPS of vertebrates is composed of monocytes macrophages and dendritic cells Together they form part of the first line of immune defense against a variety of pathogens bacteria fungi parasites and viruses and thus play an important role in maintaining organism homeostasis The mode of transmission type of replication and mechanism of disease causing differ significantly for

each pathogen eliciting a unique immune response in the host. Within this context, the MPS acts as both the sentinel and tailor of the immune system. As sentinels, MPS cells are found in blood and within tissues throughout the body to patrol against pathogenic insult. The strategy to detect microbial non-self relies on MPS to recognize conserved microbial products known as pathogen-associated molecular patterns (PAMPs). PAMPs recognition represents a checkpoint in the response to pathogens and relies on conserved pattern recognition receptors (PRRs). Upon PRR engagement, MPS mount a cell autonomous attack that includes the internalization and compartmentalization of intracellular pathogens into toxic compartments that promote destruction. In parallel, MPS cells launch an inflammatory response composed of a cellular arm and soluble factors to control extracellular pathogens. In cases when innate immunity fails to eliminate the invading microbe, MPS serves as a tailor to generate adaptive immunity for pathogen eradication and generation of memory cells, thus ensuring enhanced protection against re-infection. Indeed, MPS cell functions comprise the capture, process, migration, and delivery of antigenic information to lymphoid organs where type 1 immunity is tailored against intracellular microbes and type 2 immunity against extracellular pathogens. However, this potent adaptive immunity is also a double-edged sword that can cause aberrant inflammatory disorders like autoimmunity or chronic inflammation. For this reason, MPS also tailors tolerance immunity against unwanted inflammation. Successful clearance of the microbe results in its destruction and proper collection of debris, resolution of inflammation, and tissue healing for which MPS is essential. Reciprocally, as part of the evolutionary process taking place in all organisms, microbes evolved strategies to circumvent the actions bestowed by MPS cells. Multiple pathogens modulate the differentiation, maturation, and activation programs of the MPS as an efficient strategy to avoid a dedicated immune response. Among the most common evasion strategies are the subversion of phagocytosis, inhibition of PRR-mediated immunity, resistance to intracellular killing by reactive oxygen and nitrogen species, restriction of phagosome maturation, modulation of cellular metabolism and nutrient acquisition, regulation of cell death and autophagy, and modulation of pro-inflammatory responses and hijacking of tolerance mechanisms, among others. The tenet of this eBook is that a better understanding of MPS in infection will yield insights for development of therapeutics to enhance antimicrobial processes or dampen detrimental inflammation for the host's benefit. We believe that contributions to this topic will serve as a platform for discussion and debate about relevant issues and themes in this field. Our aim is to bring expert junior and senior scientists to address recent progress, highlight critical knowledge gaps, foment scientific exchange, and establish conceptual frameworks for future MPS investigation in the context of infectious disease.

Repenser la démocratie - Troisième volume Thierry de Briey, 2021-11-02T00:00:00Z. Dans cette troisième partie de la somme qu'il consacre à la démocratie, Thierry de Briey propose une démarche méthodologique puissante d'amélioration continue d'un régime démocratique s'inspirant des démarches qualitatives les plus récentes mises en œuvre dans des organisations publiques et privées, ainsi que sur un cadre d'évaluation comportant des indicateurs adaptables à chaque contexte historique et culturel. C'est aussi la double question de la forme de l'état et de la

manière d'engager des formes importantes pour un pays qui est abordée dans cette partie. Dans les autres parties de l'essai accessibles en ligne, le lecteur découvrirra une présentation pédagogique des fondamentaux de la démocratie selon des perspectives historique, philosophique, sociologique, psychologique, politique et géostratégique. 1re partie : les limites et frontières de la démocratie en général et en France en particulier. 2e partie : les conditions d'évolution d'une et vers une démocratie, les grandes formes souhaitables pour la France et les rapports entre démocratie et bonheur. 4e partie : une quinzaine de problèmes complétés par deux sujets d'actualité sur la démocratie. 5e partie : Un principe philosophique constitue le leitmotiv de l'ensemble de cet essai, le principe de subsidiarité qui selon l'auteur doit être le fondement structurel et organisationnel de tout régime démocratique.

Returning Southeast Asia's Past Louise Tythacott, Panggah Ardiyansyah, 2021. The last 150 years has seen extensive looting and illicit trafficking of Southeast Asia's cultural heritage. Art objects from the region were distributed to museums and private collections around the world. But in the 21st century power relations are shifting, a new awareness is growing and new questions are emerging about the representation and ownership of Southeast Asian cultural material located in the West. This book is a timely consideration of object restitution and related issues across Southeast Asia, bringing together different viewpoints including from museum professionals and scholars in Cambodia, Thailand, Vietnam and Indonesia as well as Europe, North America and Australia. The objects themselves are at the centre of most narratives, from Khmer art to the Mandalay regalia repatriated in 1964, Ban Chiang archaeological material and the paintings of Raden Saleh. Legal, cultural, political and diplomatic issues involved in the restitution process are considered in many of the chapters. Others look at the ways object restitution is integral to evolving narratives of national identity. Publisher's description.
