and Close Relationships Valerian J. Derlega, 2013-10-02 Communication Intimacy and Close Relationships offers an account of the nature of intimate relationships and their effects on people's self-concepts. The development and maintenance of intimate relationships are examined along with people's motives and goals in pursuing intimacy, the nature of social exchanges in intimate relationships, and the consequences for individuals who find themselves socially isolated. The critical role of communication in intimate relationships is given emphasis. Comprised of seven chapters, this book begins with a discussion on the role of self-disclosure in intimate relationships, as well as the risks that individuals incur when they self-disclose. The next chapter presents a cognitive interaction model of the nature of intimacy and intimate relationships within the context of cognitive social learning theory and a systems theory approach to communication. The effect of people's motives on relationships is then considered together with the role of two fundamental human motives: power and intimacy on love and friendship. The remaining chapters focus on the importance of the identification process that is how people fix their own and others' identities in social interaction, in developing relationships, patterns of nonverbal exchange in close relationships, how and why loneliness occurs, and the nature of social exchange processes in intimate relationships. The book concludes with an epilogue that provides a perspective on why people may find it difficult or easy to form intimate relationships. This monograph should be a valuable resource for psychologists and sociologists.

The scope of coverage across and within chapters is striking. The volume offers 26 chapters organized into four thematic areas: relationship methods, forms, processes, and threats, as well as a foreword and an epilogue. The volume provides a panoramic view of close relationship research as it enters the 21st century, offering highlights from current literature, original research, practical applications, and projections for future research. Relationship Methods includes both qualitative and quantitative chapters. Relationship Forms includes many of the stages, types, and roles that characterize intimate relationships. In a developmental fashion, chapters address social networks, children's friendships, adolescent relationships, adult friendships, and friendships in later life. Chapters on multicultural and multiracial relationships and gay, lesbian, and bisexual relationships illustrate the variety of relationship forms that the science of close relationships must consider. The alignments and realignments of traditional family structure are considered in terms of contemporary marriage, divorce, and single parenting, and remarried families. Relationship Processes includes chapters on emotion, attachment, romantic love, sexuality, intimacy, communication, conflict, social support, and relational maintenance. The important topic of gender concludes the section. The shadow side of human nature is explored in the Relationship Threats section with chapters
