### PURPOSE OF ACCOUNTING

- **economic entity**
  - separately identifiable organization which makes use of resources to achieve its goals and objectives.
  - may be a *business entity* operating primarily to generate profit, or a *non-profit entity* carrying out charitable and not-for-profit operations.
  - a "business entity or business organization" refers to the for profit type of economic entity. Some authors use "business entity" to refer to both for-profit and not-for-profit organizations. Nonetheless, all economic entities – whether *business or non-profit* – rely on accounting in processing and providing financial information.

### The Purpose of Accounting

- it is clear that the ultimate purpose of accounting is to provide information to different users.
- The users utilize the information in making economic decisions.

*"Accounting is a service activity. Its function is to provide quantitative information, primarily financial in*

*nature, about economic entities that is intended to be useful in making economic decisions, in making reasoned choices among alternative courses of action"*

- American Institute of Certified Public Accountants (AICPA)

*"Accounting is the process of identifying, measuring and communicating economic information to permit informed judgment and decision by users of the information."*

- American Accounting Association (AAA)

- Both of the above definitions and the very nature of accounting suggest its basic purpose – to provide information needed by users in making economic decisions.
