CLASSIFICATION

A Similarities in organisms are explained by...

Common ancestor

Similarity in DNA

Similar characteristics

B **Homologous structure**

structures between two different organism that are similar but have different functions

analogous structure

two structures from different lines that have the same function

Natural Selection: when an organism adapts to an environment to better survive

Survival of the fittest: individuals that are better suited to their environment are more successful

D Individuals don't evolve, populations do.

E Predation can reduce the prey population density and can alter species diversity. Competition can cause species to migrate or can even cause them to decrease.

F **coloration,**

camouflage, and mimicry increase fitness because it keeps the population up + makes it easier to reproduce

J **Cladograms**

The closer organisms are, the more common ancestors. They are more in common and may have very similar structures or actions.
