Grid Computing Francisco Fernández Rivera, 2004-02-18 This book constitutes the thoroughly refereed post proceedings of the First European Across Grids Conference held in Santiago de Compostela Spain in February 2003 The 39 revised full papers presented were carefully selected during two rounds of reviewing and improvement The papers address all current issues in grid computing in particular grid middleware architectures tools resource management job scheduling data management grid based distant e learning stream oriented database management data stripping large scale grid applications simulation visualization data mining grid performance analysis and grid monitoring Data Structures For Particle Physics Experiments: Evolution Or Revolution? - Proceedings Of The 14th Workshop On The Infn Eloisatron Project Rene Brun, Paolo Palazzi, 1991-11-12 HEP data structure systems such as ADAMO BOS CHEETAH JAZELLE ZEBRA etc are not static but continue to evolve some slowly others more quickly Large systems have been built on them and by a careful comparison of their usage in experiments one should be able to better understand which way to go It is crucial to preserve the current investment while exploiting new computing technology Experiments at large colliders are taking data and doing physics or about to do so so one can now compare practical experiences with different data management solutions in the area of Simulation of Interactions and their Detection Data Acquisition On Line Management Description of Detector and other Equipment Experiment and Data Processing Bookkeeping Reconstruction Algorithms Event Display and Statistical Data Analysis The articles in these proceedings are by contributors who are active in developing computer systems for Experimental Particle Physics where the organisation of the data plays an important role as well as those who are building systems and packages to make this work easier Extensive Air Showers Peter K. F. Grieder, 2010-08-09 Extensive air showers are a very unique phenomenon In the more than six decades since their discovery by Auger and collaborators we have learned a lot about these extremely energetic events and gained deep insight into high energy phenomena particle physics and astrophysics In this Tutorial Reference Manual and Data Book Peter K F Grieder provides the reader with a comprehensive view of the phenomenology and facts of the various types of interactions and cascades theoretical background experimental methods data evaluation and interpretation and air shower simulation He discusses astrophysical aspects of the primary radiation and addresses remaining puzzling questions that cannot yet be answered They remain as a challenge for present and future research in the field The book is split into two volumes Volume I deals mainly with the basic theoretical framework of the processes that determine an air shower and ends with a summary of ways and means to extract information from air shower observations on the primary radiation It also presents a compilation of data of our current knowledge of the high energy portion of the primary spectrum and composition Volume II contains mainly compilations of data of experimental and theoretical nature as well as predictions from simulations of individual air shower constituents Also included are chapters dedicated exclusively to special processes and detection methods Extensive up to date reference lists

appear at the end of each chapter Researchers and students working in the field of cosmic ray detection and astroparticle physics will appreciate finding this book in their library *Backgrounds At Machine-detector Interface - Proceedings Of The Second Workshop* Thomas E Browder,S K Sahu,1998-09-02 At high luminosity bottom charm and factories synchrotron radiation and lost particles due to beam gas interaction cause huge backgrounds to detectors posing problems in trigger rates radiation damage and efficiency Studies of such effects have been made and are reported in this book **Proceedings - Arkansas Academy of Science** Arkansas Academy of Science,1993 **Cosmic Rays in the Galaxy, Black Holes, Dark Matter and Dark Energy** Jörg R. Totsuka,1999-07-28 The scientific program of these important proceedings was arranged to cover most of the field of neutrino physics In light of the rapid growth of interest stimulated by new interesting results from the field more than half of the papers presented here are related to the neutrino mass and oscillations including atmospheric and solar neutrino studies Neutrino mass and oscillations could imply the existence of a mass scale many orders of magnitudes higher than presented in current physics and will probably guide scientists beyond the standard model of particle physics
