

GARMIN

VHF 110/210 AIS SERIES Installation Instructions

Important Safety Information

⚠ WARNING

See the Important Safety and Product Information guide in the product box for product warnings and other important information.

⚠ CAUTION

Always wear safety goggles, ear protection, and a dust mask when drilling, cutting, or sanding.

NOTICE

When drilling or cutting, always check what is on the opposite side of the surface.

Registering Your Device

Help us better support you by completing our online registration today.

- Go to <http://my.garmin.com>.
- Keep the original sales receipt, or a photocopy, in a safe place.

Contacting Garmin® Product Support

- Go to www.garmin.com/support for in-country support information.
- In the USA, call 913-357-8200 or 1-800-800-1020.
- In the UK, call 0900 236 0000.
- In Europe, call +44 (0) 870 850 1241.

Mounting Considerations

NOTICE

This device should be mounted in a location that is not exposed to extreme temperatures or conditions. The temperature range for this device is listed in the product specifications. Extended exposure to temperatures exceeding the specified temperature range, in storage or operating conditions, may cause device failure. Extreme-temperature-induced damage and related consequences are not covered by the warranty.

When selecting a mounting location, you should observe these considerations.

- The location should provide optimal viewing as you operate your boat.
- The location should allow for easy access to all device interfaces, such as the keypad, touchscreen, and card reader, if applicable.
- The location must be strong enough to support the weight of the device and protect it from excessive vibration or shock.
- To avoid interference with a magnetic compass, the device should not be installed closer to a compass than the compass-safe distance value listed in the product specifications.

- The location must allow room for the routing and connection of all cables.

Antenna Mounting and EME Exposure

⚠ WARNING

Radio operators with cardiac pacemakers, life-support machines, or electrical medical equipment should not be exposed to excessive radio-frequency (RF) fields, because the RF field may interfere with the function of their medical equipment.

⚠ CAUTION

This device generates and radiates radio frequency (RF) electromagnetic energy (EME). Failure to observe these guidelines may expose people to RF radiation absorption exceeding the maximum permissible exposure (MPE).

Garmin declares a MPE radius of 2.48 m (81.64 in.) for this system, which was determined using 25 W output to an omni-directional, 6 dBi gain antenna. The antenna should be installed to maintain a distance of 2.48 m (81.64 in.) between the antenna and all people.

Bolt Mounting the Device

NOTICE

If you are mounting the bracket on fiberglass with screws, it is recommended to use a countersink bit to drill a clearance counterbore through only the top gel-coat layer. This will help to avoid cracking in the gel-coat layer when the screws are tightened.

Stainless-steel screws may bind when screwed into fiberglass and overlightened. It is recommended to apply an anti-seize lubricant on the screws before installing them.

You can use the included bracket to bolt mount the device on a flat surface.

- 1 Using the bolt-mount bracket (1) as a template, mark the pilot holes.

- 2 Using a 3.5 mm (1/8 in.) drill bit, drill the pilot holes.
- 3 Using the included screws (2), secure the bolt-mount bracket to the mounting surface.
- 4 Install the bolt-mount knobs (3) on the sides of the device.
- 5 Place the device in the bolt-mount bracket and tighten the bolt-mount knobs.

Flush Mounting the Device

NOTICE

Be careful when cutting the hole to flush mount the device. There is only a small amount of clearance between the case and the mounting holes, and cutting the hole too large could compromise the stability of the device after it is mounted.

If you are mounting the bracket on fiberglass with screws, it is recommended to use a countersink bit to drill a clearance counterbore through only the top gel-coat layer. This will help to avoid cracking in the gel-coat layer when the screws are tightened.
